

Classified as hazardous in accordance with the criteria of EPA New Zealand

## Section 1 - Identification

### Product Identifier

|                      |                                                        |
|----------------------|--------------------------------------------------------|
| Product Name         | <u>4-Acetamidophenol</u>                               |
| CAS No               | 103-90-2                                               |
| Synonyms             | p-Hydroxyacetanilide; Paracetamol; Acetaminophen; APAP |
| Molecular Formula    | C8 H9 N O2                                             |
| Molecular Weight     | 151.16                                                 |
| Recommended Use      | Laboratory chemicals.                                  |
| Uses advised against | No Information available                               |

|                         |                                                                                             |
|-------------------------|---------------------------------------------------------------------------------------------|
| Product Code            | <b>A11240</b>                                                                               |
| Address                 | Thermo Fisher Scientific New Zealand Ltd<br>244 Bush Road, Albany,<br>Auckland, New Zealand |

## Section 2 - Hazard(s) Identification

### Classification under Work Safe New Zealand

Classified as hazardous in accordance with the criteria of EPA New Zealand

HSNO Approval Number     **HSR100425**

### GHS Classification

#### Physical hazards

Based on available data, the classification criteria are not met

#### Health hazards

Acute Oral Toxicity     Category 4

#### Environmental hazards

Chronic aquatic toxicity     Category 3

### Label Elements

**Signal Word****Warning****Hazard Statements**

H302 - Harmful if swallowed

H412 - Harmful to aquatic life with long lasting effects

**Precautionary Statements****Prevention**

P264 - Wash face, hands and any exposed skin thoroughly after handling

P270 - Do not eat, drink or smoke when using this product

**Response**

P301 + P312 - IF SWALLOWED: Call a POISON CENTER or doctor if you feel unwell

P330 - Rinse mouth

**Storage**

P403 - Store in a well-ventilated place

**Disposal**

P501 - Dispose of contents/ container to an approved waste disposal plant

**Other hazards which do not result in classification**

Toxic to terrestrial vertebrates

## Section 3 - Composition and Information on Ingredients

| Component                            | CAS No   | Weight % |
|--------------------------------------|----------|----------|
| Acetaminophen (4-Hydroxyacetanilide) | 103-90-2 | 98       |

## Section 4 - First Aid Measures

**Description of first aid measures****New Zealand Emergency Tel.**CHEMTREC®  
09 980 6780 or +64 9 980 6780**Inhalation**

Remove from exposure, lie down. Remove to fresh air. If not breathing, give artificial respiration. Get medical attention.

**Eye Contact**

Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Get medical attention.

**Skin Contact**

Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Get medical attention.

**Ingestion**

Clean mouth with water. Get medical attention.

**Self-Protection of the First Aider**

Ensure that medical personnel are aware of the material(s) involved, take precautions to protect themselves and prevent spread of contamination.

**First Aid Facilities**

Eyewash, safety shower and washroom.

**Most important symptoms and effects**

No information available.

**Notes to Physician**

Treat symptomatically.

## **Section 5 - Fire Fighting Measures**

**Suitable Extinguishing Media**Water spray. Carbon dioxide (CO<sub>2</sub>). Dry chemical. Chemical foam.**Extinguishing media which must not be used for safety reasons**

No information available.

**Specific Hazards Arising from the Chemical**

Thermal decomposition can lead to release of irritating gases and vapors.  
Dusts or fumes may form explosive mixtures in air

**Hazardous Combustion Products**Nitrogen oxides (NO<sub>x</sub>), Carbon monoxide (CO), Carbon dioxide (CO<sub>2</sub>).**Special protective equipment and precautions for fire fighters**

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

## **Section 6 - Accidental Release Measures**

**Personal Precautions, Protective Equipment and Emergency Procedures****Emergency procedures**

Ensure adequate ventilation.

**Environmental Precautions**

Do not flush into surface water or sanitary sewer system.

**Methods for Containment and Clean Up**

Sweep up and shovel into suitable containers for disposal. Avoid dust formation.

**Precautions to prevent secondary hazards**

Clean contaminated objects and areas thoroughly observing environmental regulations

**Reference to Other Sections**

Refer to protective measures listed in Sections 8 and 13.

## **Section 7 - Handling and Storage**

**Precautions for Safe Handling****Advice on safe handling**

Avoid contact with skin and eyes. Do not breathe dust.

**Hygiene Measures**

Handle in accordance with good industrial hygiene and safety practice. Keep away from food, drink and animal feeding stuffs. Do not eat, drink or smoke when using this product. Remove and wash contaminated clothing and gloves, including the inside, before re-use. Wash hands before breaks and after work.

**Conditions for Safe Storage, Including any Incompatibilities****Storage Conditions**

Keep in a dry, cool and well-ventilated place. Keep container tightly closed. Protect from direct sunlight.

**Incompatible Materials**

Acids. Strong oxidizing agents. Alkaline.

AS/NZS 2243.10:2004, Safety in laboratories - Storage of chemicals

## Section 8 - Exposure Controls and Personal Protection

### Control parameters

#### Exposure limits

UK - EH40/2005 Work Exposure Limits, Fourth edition. Published 2020.

| Component                               | New Zealand WEL | Australia | ACGIH TLV | The United Kingdom                                                  |
|-----------------------------------------|-----------------|-----------|-----------|---------------------------------------------------------------------|
| Acetaminophen<br>(4-Hydroxyacetanilide) |                 |           |           | STEL: 30 mg/m <sup>3</sup> 15 min<br>TWA: 10 mg/m <sup>3</sup> 8 hr |

#### Biological limit values

This product, as supplied, does not contain any hazardous materials with biological limits established by the region specific regulatory bodies

### Appropriate engineering controls

#### Engineering Measures

Ensure adequate ventilation, especially in confined areas. Ensure that eyewash stations and safety showers are close to the workstation location. Wherever possible, engineering control measures such as the isolation or enclosure of the process, the introduction of process or equipment changes to minimise release or contact, and the use of properly designed ventilation systems, should be adopted to control hazardous materials at source

### Individual protection measures, such as personal protective equipment

**Eye Protection** Wear safety glasses with side shields (or goggles) (Australian/New Zealand Standard AS/NZS 1337 - Eye protectors for Industrial applications)

**Hand Protection** Protective gloves

| Glove material                                    | Breakthrough time                    | Glove thickness | AUS/NZ Standard | Glove comments        |
|---------------------------------------------------|--------------------------------------|-----------------|-----------------|-----------------------|
| Nitrile rubber, Neoprene,<br>Natural rubber, PVC. | See manufacturers<br>recommendations | -               | AS/NZS 2161     | (minimum requirement) |

Inspect gloves before use.

Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. (Refer to manufacturer/supplier for information)

Ensure gloves are suitable for the task: Chemical compatibility, Dexterity, Operational conditions, User susceptibility, e.g. sensitisation effects, also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion.

Remove gloves with care avoiding skin contamination.

**Skin and body protection** Wear appropriate protective gloves and clothing to prevent skin exposure

**Respiratory Protection** Use an AS/NZS 1716 approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced. To protect the wearer, respiratory protective equipment must be the correct fit and be used and maintained in line with AS/NZS 1715 on the use and maintenance of respiratory protective devices (or AUS/NZ equivalent)

**Hygiene Measures** Handle in accordance with good industrial hygiene and safety practice.

**Environmental exposure controls** Prevent product from entering drains. Do not allow material to contaminate ground water system.

## Section 9 - Physical and Chemical Properties

### Information on basic physical and chemical properties

|                                                |                                 |                                          |
|------------------------------------------------|---------------------------------|------------------------------------------|
| <b>Physical State</b>                          | Solid                           |                                          |
| <b>Appearance</b>                              | White                           |                                          |
| <b>Odor</b>                                    | Odorless                        |                                          |
| <b>Odor Threshold</b>                          | No data available               |                                          |
| <b>pH</b>                                      | 5.5-6.5                         |                                          |
| <b>Melting Point/Range</b>                     | 168 - 172 °C / 334.4 - 341.6 °F |                                          |
| <b>Softening Point</b>                         | No data available               |                                          |
| <b>Boiling Point/Range</b>                     | No information available        |                                          |
| <b>Flammability (liquid)</b>                   | Not applicable                  | Solid                                    |
| <b>Flammability (solid,gas)</b>                | No information available        |                                          |

| <b>Bulk Density</b>                            | No data available               |                                          |
| <b>Vapor Density</b>                           | Not applicable                  | Solid                                    |
| <b>Particle characteristics</b>                | No data available               |                                          |
| <b><u>Other information</u></b>                |                                 |                                          |
| <b>Molecular Formula</b>                       | C8 H9 N O2                      |                                          |
| <b>Molecular Weight</b>                        | 151.16                          |                                          |
| <b>Evaporation Rate</b>                        | Not applicable - Solid          |                                          |

## Section 10 - Stability and Reactivity

|                                         |                                                                                 |
|-----------------------------------------|---------------------------------------------------------------------------------|
| <b>Reactivity</b>                       | None known, based on information available                                      |
| <b>Stability</b>                        | Light sensitive. Stable.                                                        |
| <b>Sensitivity to Mechanical Impact</b> | No information available                                                        |
| <b>Sensitivity to Static Discharge</b>  | No information available                                                        |
| <b>Hazardous Polymerization</b>         | Hazardous polymerization does not occur.                                        |
| <b>Hazardous Reactions</b>              | No information available.                                                       |
| <b>Conditions to Avoid</b>              | Exposure to light, Incompatible products.                                       |
| <b>Incompatible Materials</b>           | Acids, Strong oxidizing agents, Alkaline.                                       |
| <b>Hazardous Decomposition Products</b> | Nitrogen oxides (NOx). Carbon monoxide (CO). Carbon dioxide (CO <sub>2</sub> ). |

## Section 11 - Toxicological Information

### Acute Effects

### Information on likely routes of exposure

## Product Information

**Inhalation** Not an expected route of exposure.  
**Eyes** Avoid contact with eyes.  
**Skin** Avoid contact with skin.  
**Ingestion** May be harmful if swallowed.

## Numerical measures of toxicity

## (a) acute toxicity;

**Oral** Category 4  
**Dermal** No data available  
**Inhalation** No data available

| Component                            | LD50 Oral                 | LD50 Dermal | LC50 Inhalation |
|--------------------------------------|---------------------------|-------------|-----------------|
| Acetaminophen (4-Hydroxyacetanilide) | LD50 = 1944 mg/kg ( Rat ) |             |                 |

## (b) skin corrosion/irritation;

**Test method** OECD 404  
**Test species** rabbit  
**Observational endpoint** No skin irritation

## (c) serious eye damage/irritation;

**Test method** OECD 405  
**Test species** rabbit  
**Observation end point** No eye irritation

## (d) respiratory or skin sensitization;

**Respiratory** No data available  
**Skin** No data available

## (e) germ cell mutagenicity;

No data available

| Component                                               | Test method             | Test species | Study result |
|---------------------------------------------------------|-------------------------|--------------|--------------|
| Acetaminophen (4-Hydroxyacetanilide)<br>103-90-2 ( 98 ) | OECD Test Guideline 471 | in vitro     | negative     |

Not mutagenic in AMES Test

## (f) carcinogenicity;

Not classified  
 Did not show carcinogenic effects in animal experiments

(g) reproductive toxicity;  
Reproductive Effects

Not classified  
 Animal testing did not show any effects on fertility

## (h) STOT-single exposure;

No data available

## (i) STOT-repeated exposure;

No data available

## Target Organs

No information available.

## (j) aspiration hazard;

Not applicable  
 Solid

**Other Adverse Effects** The toxicological properties have not been fully investigated.

**Symptoms / effects, both acute and delayed**  
No information available.

## Section 12 - Ecological Information

### Ecotoxicity

**Aquatic ecotoxicity** The product contains following substances which are hazardous for the environment.  
Contains a substance which is: Toxic to aquatic organisms.

| Component                            | Freshwater Fish                                                | Water Flea                      | Freshwater Algae     | Microtox                                                                              |
|--------------------------------------|----------------------------------------------------------------|---------------------------------|----------------------|---------------------------------------------------------------------------------------|
| Acetaminophen (4-Hydroxyacetanilide) | LC50: = 814 mg/L, 96h<br>flow-through<br>(Pimephales promelas) | 50 mg/L EC50 48 h<br>(OECD 202) | IC50= 134 mg/l (72H) | EC50 = 1000 mg/L 30<br>min<br>EC50 = 1050 mg/L 15<br>min<br>EC50 = 1120 mg/L 5<br>min |

**Terrestrial ecotoxicity** There is no data for this product

### Persistence and Degradability

**Persistence** Persistence is unlikely.

| Component                                               | Degradability        |
|---------------------------------------------------------|----------------------|
| Acetaminophen (4-Hydroxyacetanilide)<br>103-90-2 ( 98 ) | 57% (OECD 301F) 28 d |

**Degradation in sewage treatment plant** Contains substances known to be hazardous to the environment or not degradable in waste water treatment plants.

**Bioaccumulative Potential** Bioaccumulation is unlikely

| Component                            | log Pow | Bioconcentration factor (BCF) |
|--------------------------------------|---------|-------------------------------|
| Acetaminophen (4-Hydroxyacetanilide) | 1.098   | No data available             |

**Mobility** The product is water soluble, and may spread in water systems. . Will likely be mobile in the environment due to its water solubility. Highly mobile in soils

### Other adverse effects

**Endocrine Disruptor Information** This product does not contain any known or suspected endocrine disruptors  
**Persistent Organic Pollutant** This product does not contain any known or suspected substance  
**Ozone Depletion Potential** This product does not contain any known or suspected substance

## Section 13 - Disposal Considerations

### Waste treatment methods

**Waste from Residues/Unused Products** Do not allow into drains or watercourses or dispose of where ground or surface waters may be affected. Wastes, including emptied containers, are controlled wastes and should be disposed of in accordance with all federal, E.P.A., state and local regulations. Assure conformity with all applicable regulations.

**Contaminated Packaging** Dispose of this container to hazardous or special waste collection point.

|                   |                                                                                                                                                                                                                                                                                                                           |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Other Information | Disposal agencies or waste contractors must comply with the New Zealand Hazardous Substances (Disposal) Regulations. Do not flush to sewer. Waste codes should be assigned by the user based on the application for which the product was used. Do not empty into drains. Do not let this chemical enter the environment. |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## Section 14 - Transport Information

|                                                                          |                                                                                                                         |
|--------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| NZS 5433:2020                                                            | Not regulated                                                                                                           |
| IATA                                                                     | Not regulated                                                                                                           |
| IMDG/IMO                                                                 | Not regulated                                                                                                           |
| Environmental hazards                                                    | No hazards identified                                                                                                   |
| Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code | Not applicable, packaged goods                                                                                          |
| Special Precautions                                                      | No special precautions required. Please refer to the applicable dangerous goods regulations for additional information. |
| Additional information                                                   | None known                                                                                                              |

## Section 15 - Regulatory Information

### Safety, health and environmental regulations/legislation specific for the substance or mixture

|                      |           |
|----------------------|-----------|
| HSNO Approval Number | HSR100425 |
|----------------------|-----------|

#### National Regulations

There are no applicable tolerable exposure limits or environmental exposure limits according to the EPA Controls for Hazardous Substances

#### Certified handlers, tracking and controlled substance license requirements

Certified handlers are required for some substances. This includes substances requiring a controlled substance license, and most explosives, vertebrates toxic agents, and certain fumigants. Acutely toxic substances which are a Category 1 or 2, such as pesticides also require Certified handlers. Please check the Health and Safety at Work Act 2015 for further information. Tracking is required for some highly hazardous substances. These substances need to be under the control of an appropriately trained person or appropriately secured. Please check the Health and Safety at Work Act 2015 for further information.

#### Prohibition or notification/licensing requirements

Shown below are details of specific prohibition/notifications or licencing requirements when they apply.

### International Regulations

|                                                  |                                                                |
|--------------------------------------------------|----------------------------------------------------------------|
| Ozone Depletion Potential                        | This product does not contain any known or suspected substance |
| Persistent Organic Pollutant                     | This product does not contain any known or suspected substance |
| Rotterdam Convention (PIC)                       | Not applicable                                                 |
| Authorisation/Restrictions according to EU REACH | Not applicable                                                 |

Suppliers safety data sheet, Chemadvisor - LOLI, Merck index, RTECS

EPA Guide to classifying hazardous substances in New Zealand

EPA - Assigning a product to an existing HSNO approval guide

**Training Advice**

Chemical hazard awareness training, incorporating labelling, Safety Data Sheets (SDS), Personal Protective Equipment (PPE) and hygiene.

Use of personal protective equipment, covering appropriate selection, compatibility, breakthrough thresholds, care, maintenance, fit and standards.

First aid for chemical exposure, including the use of eye wash and safety showers.
