

## SAFETY DATA SHEET

Revision Date 25-March-2024

Revision Number 4

### 1. Identification

**Product Name** Tetramethylammonium hydroxide, 25% w/w in methanol

**Cat No. :** 30833

**Synonyms** No information available

**Recommended Use** Laboratory chemicals.

**Uses advised against** Food, drug, pesticide or biocidal product use.

#### Details of the supplier of the safety data sheet

##### Company

##### **Importer/Distributor**

Fisher Scientific  
112 Colonnade Road,  
Ottawa, ON K2E 7L6,  
Canada  
Tel: 1-800-234-7437

##### **Emergency Telephone Number**

For information **US** call: 001-800-227-6701 / **Europe** call: +32 14 57 52 11  
Emergency Number **US**:001-201-796-7100 / **Europe**: +32 14 57 52 99  
**CHEMTREC** Tel. No. **US**:001-800-424-9300 / **Europe**:001-703-527-3887

### 2. Hazard(s) identification

#### Classification

**WHMIS 2015 Classification** Classified as hazardous under the Hazardous Products Regulations (SOR/2015-17)

|                                                                                |              |
|--------------------------------------------------------------------------------|--------------|
| <b>Flammable liquids</b>                                                       | Category 2   |
| <b>Acute oral toxicity</b>                                                     | Category 2   |
| <b>Acute dermal toxicity</b>                                                   | Category 1   |
| <b>Acute Inhalation Toxicity</b>                                               | Category 3   |
| <b>Skin Corrosion/Irritation</b>                                               | Category 1 B |
| <b>Serious Eye Damage/Eye Irritation</b>                                       | Category 1   |
| <b>Specific target organ toxicity (single exposure)</b>                        | Category 1   |
| Target Organs - Optic nerve, Central nervous system (CNS), Respiratory system. |              |
| <b>Specific target organ toxicity - (repeated exposure)</b>                    | Category 1   |
| Target Organs - Thymus.                                                        |              |

#### Label Elements

##### **Signal Word**

Danger

### **Hazard Statements**

Highly flammable liquid and vapor  
Toxic if inhaled  
Fatal if swallowed or in contact with skin  
Causes severe skin burns and eye damage  
May cause respiratory irritation  
May cause drowsiness and dizziness  
Causes damage to organs  
Causes damage to organs through prolonged or repeated exposure

### **Precautionary Statements**

#### **Prevention**

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking  
Keep container tightly closed  
Ground/bond container and receiving equipment  
Use explosion-proof electrical/ventilating/lighting/equipment  
Do not breathe dust/fumes/gas/mist/vapours/spray  
Do not get in eyes, on skin, or on clothing  
Wash face, hands and any exposed skin thoroughly after handling  
Do not eat, drink or smoke when using this product  
Use only outdoors or in a well-ventilated area  
Wear protective gloves/protective clothing/eye protection/face protection  
Use non-sparking tools  
Take action to prevent static discharges

#### **Response**

IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/ shower  
IF INHALED: Remove person to fresh air and keep comfortable for breathing  
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing  
Immediately call a POISON CENTER/doctor  
Rinse mouth  
Do NOT induce vomiting  
Wash contaminated clothing before reuse  
In case of fire: Use dry sand, dry chemical or alcohol-resistant foam to extinguish

#### **Storage**

Store locked up  
Store in a well-ventilated place. Keep container tightly closed

#### **Disposal**

Dispose of contents/container to an approved waste disposal plant

### **Other Hazards**

Toxic to aquatic life with long lasting effects  
Poison, may be fatal or cause blindness if swallowed

## **3. Composition/Information on Ingredients**

| <b>Component</b>              | <b>CAS-No</b> | <b>Weight %</b> |
|-------------------------------|---------------|-----------------|
| Methanol                      | 67-56-1       | 75              |
| Tetramethylammonium hydroxide | 75-59-2       | 25              |

#### 4. First-aid measures

|                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|----------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Eye Contact</b>                     | Immediate medical attention is required. Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes.                                                                                                                                                                                                                                                                                                             |
| <b>Skin Contact</b>                    | Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Immediate medical attention is required.                                                                                                                                                                                                                                                                                                |
| <b>Inhalation</b>                      | Remove from exposure, lie down. Remove to fresh air. If not breathing, give artificial respiration. Get medical attention.                                                                                                                                                                                                                                                                                                                    |
| <b>Ingestion</b>                       | Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Drink plenty of water. Call a physician immediately. If possible drink milk afterwards.                                                                                                                                                                                                                                                                        |
| <b>Most important symptoms/effects</b> | Difficulty in breathing. Causes burns by all exposure routes. Inhalation of high vapor concentrations may cause symptoms like headache, dizziness, tiredness, nausea and vomiting; Product is a corrosive material. Use of gastric lavage or emesis is contraindicated. Possible perforation of stomach or esophagus should be investigated: Ingestion causes severe swelling, severe damage to the delicate tissue and danger of perforation |
| <b>Notes to Physician</b>              | Treat symptomatically                                                                                                                                                                                                                                                                                                                                                                                                                         |

#### 5. Fire-fighting measures

|                                         |                                                                                                                                                                     |
|-----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Suitable Extinguishing Media</b>     | Carbon dioxide (CO <sub>2</sub> ). Dry chemical. Water mist may be used to cool closed containers. Chemical foam. Water mist may be used to cool closed containers. |
| <b>Unsuitable Extinguishing Media</b>   | No information available                                                                                                                                            |
| <b>Flash Point</b>                      | 6 °C / 42.8 °F                                                                                                                                                      |
| <b>Method -</b>                         | No information available                                                                                                                                            |
| <b>Autoignition Temperature</b>         | 455 °C / 851 °F                                                                                                                                                     |
| <b>Explosion Limits</b>                 |                                                                                                                                                                     |
| <b>Upper</b>                            | No data available                                                                                                                                                   |
| <b>Lower</b>                            | No data available                                                                                                                                                   |
| <b>Sensitivity to Mechanical Impact</b> | No information available                                                                                                                                            |
| <b>Sensitivity to Static Discharge</b>  | No information available                                                                                                                                            |

#### Specific Hazards Arising from the Chemical

Flammable. Vapors may travel to source of ignition and flash back. Containers may explode when heated. Vapors may form explosive mixtures with air.

#### Hazardous Combustion Products

Nitrogen oxides (NO<sub>x</sub>). Carbon monoxide (CO). Carbon dioxide (CO<sub>2</sub>).

#### Protective Equipment and Precautions for Firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

#### NFPA

**Instability**  
1

**Physical hazards**  
N/A

#### 6. Accidental release measures

**Personal Precautions**  
**Environmental Precautions**

Remove all sources of ignition. Take precautionary measures against static discharges. See Section 12 for additional Ecological Information. Do not flush into surface water or sanitary sewer system. Avoid release to the environment. Collect spillage.

**Methods for Containment and Clean Up**

Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Keep in suitable, closed containers for disposal. Remove all sources of ignition. Use spark-proof tools and explosion-proof equipment. Do not let this chemical enter the environment.

## 7. Handling and storage

**Handling**

Do not breathe mist/vapors/spray. Do not get in eyes, on skin, or on clothing. Handle product only in closed system or provide appropriate exhaust ventilation. Use spark-proof tools and explosion-proof equipment. Use only non-sparking tools. Keep away from open flames, hot surfaces and sources of ignition. To avoid ignition of vapors by static electricity discharge, all metal parts of the equipment must be grounded. Take precautionary measures against static discharges.

**Storage.**

Keep away from heat, sparks and flame. Flammables area. Store under an inert atmosphere. Keep containers tightly closed in a dry, cool and well-ventilated place. Corrosives area. Incompatible Materials. Acids. Acid anhydrides. Acid chlorides. Metals. Reducing Agent.

## 8. Exposure controls / personal protection

**Exposure Guidelines**

| Component | Alberta                                                                                            | British Columbia                      | Ontario TWAEV                         | Quebec                                                                                             | ACGIH TLV                             | OSHA PEL                                                                                                                                                                                 | NIOSH                                                                                                        |

**Legend**

ACGIH - American Conference of Governmental Industrial Hygienists

OSHA - Occupational Safety and Health Administration

NIOSH: NIOSH - National Institute for Occupational Safety and Health

**Engineering Measures**

Ensure adequate ventilation, especially in confined areas. Ensure that eyewash stations and safety showers are close to the workstation location. Use explosion-proof electrical/ventilating/lighting/equipment.

Wherever possible, engineering control measures such as the isolation or enclosure of the process, the introduction of process or equipment changes to minimise release or contact, and the use of properly designed ventilation systems, should be adopted to control hazardous materials at source

**Personal protective equipment**

**Eye Protection**  
**Hand Protection**

Goggles  
Protective gloves

| Glove material                                      | Breakthrough time                 | Glove thickness | Glove comments         |
|-----------------------------------------------------|-----------------------------------|-----------------|------------------------|
| Natural rubber<br>Nitrile rubber<br>Neoprene<br>PVC | See manufacturers recommendations | -               | Splash protection only |

Inspect gloves before use. observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. (Refer to manufacturer/supplier for information) gloves are suitable for the task: Chemical compatability, Dexterity, Operational conditions, User susceptibility, e.g. sensitisation effects, also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion. gloves with care avoiding skin contamination.

#### **Respiratory Protection**

When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced.

To protect the wearer, respiratory protective equipment must be the correct fit and be used and maintained properly

**Recommended Filter type:** Organic gases and vapours filter Type A Brown conforming to EN14387

When RPE is used a face piece Fit Test should be conducted

#### **Environmental exposure controls**

Prevent product from entering drains.

#### **Hygiene Measures**

Handle in accordance with good industrial hygiene and safety practice. Keep away from food, drink and animal feeding stuffs. Do not eat, drink or smoke when using this product. Remove and wash contaminated clothing and gloves, including the inside, before re-use. Wash hands before breaks and after work.

## **9. Physical and chemical properties**

|                                        |                          |
|----------------------------------------|--------------------------|
| Physical State                         | Liquid                   |
| Appearance                             | Light yellow             |
| Odor                                   | No information available |
| Odor Threshold                         | No information available |
| pH                                     | 12-13                    |
| Melting Point/Range                    | -98 °C / -144.4 °F       |
| Boiling Point/Range                    | 65 °C / 149 °F           |
| Flash Point                            | 6 °C / 42.8 °F           |
| Evaporation Rate                       | No information available |
| Flammability (solid,gas)               | Not applicable           |
| Flammability or explosive limits       |                          |
| Upper                                  | No data available        |
| Lower                                  | No data available        |
| Vapor Pressure                         | 17.5 mmHg @ 20 °C        |
| Vapor Density                          | No information available |
| Specific Gravity                       | 0.900                    |
| Solubility                             | Soluble in water         |
| Partition coefficient; n-octanol/water | No data available        |
| Autoignition Temperature               | 455 °C / 851 °F          |
| Decomposition Temperature              | No information available |
| Viscosity                              | No information available |
| Molecular Formula                      | C4 H13 N O               |
| Molecular Weight                       | 91.15                    |

## **10. Stability and reactivity**

|                        |                                            |
|------------------------|--------------------------------------------|
| <b>Reactive Hazard</b> | None known, based on information available |
| <b>Stability</b>       | Air sensitive.                             |

|                                         |                                                                                                                        |
|-----------------------------------------|------------------------------------------------------------------------------------------------------------------------|
| <b>Conditions to Avoid</b>              | Keep away from open flames, hot surfaces and sources of ignition. Excess heat. Exposure to air. Incompatible products. |
| <b>Incompatible Materials</b>           | Acids, Acid anhydrides, Acid chlorides, Metals, Reducing Agent                                                         |
| <b>Hazardous Decomposition Products</b> | Nitrogen oxides (NO <sub>x</sub> ), Carbon monoxide (CO), Carbon dioxide (CO <sub>2</sub> )                            |
| <b>Hazardous Polymerization</b>         | Hazardous polymerization does not occur.                                                                               |
| <b>Hazardous Reactions</b>              | None under normal processing.                                                                                          |

## 11. Toxicological information

### Acute Toxicity

#### Product Information

##### Oral LD50

Category 3. ATE = 50 - 300 mg/kg. Category 2. ATE = 5 - 50 mg/kg.

##### Dermal LD50

Category 3. ATE = 200 - 1000 mg/kg. Category 1. ATE < 50 mg/kg.

##### Vapor LC50

Based on ATE data, the classification criteria are not met. ATE > 20 mg/l. Category 3. ATE = 2 - 10 mg/l.

#### Component Information

| Component                     | LD50 Oral                      | LD50 Dermal                 | LC50 Inhalation             |
|-------------------------------|--------------------------------|-----------------------------|-----------------------------|
| Methanol                      | LD50 = 1187 – 2769 mg/kg (Rat) | LD50 = 17100 mg/kg (Rabbit) | LC50 = 128.2 mg/L (Rat) 4 h |
| Tetramethylammonium hydroxide | LD50 34 - 50 mg/kg (Rat)       | 25-50 mg/kg (Rabbit)        | Not listed                  |

**Toxicologically Synergistic** No information available

#### Products

#### Delayed and immediate effects as well as chronic effects from short and long-term exposure

**Irritation** Causes severe burns by all exposure routes

**Sensitization** No information available

**Carcinogenicity** The table below indicates whether each agency has listed any ingredient as a carcinogen.

| Component                     | CAS-No  | IARC       | NTP        | ACGIH      | OSHA       | Mexico     |
|-------------------------------|---------|------------|------------|------------|------------|------------|
| Methanol                      | 67-56-1 | Not listed | Not listed | Not listed | Not listed | Not listed |
| Tetramethylammonium hydroxide | 75-59-2 | Not listed | Not listed | Not listed | Not listed | Not listed |

**Mutagenic Effects** No information available

**Reproductive Effects** California Proposition 65. Reproductive toxicity.

**Developmental Effects** No information available.

**Teratogenicity** No information available.

**STOT - single exposure** Optic nerve Central nervous system (CNS) Respiratory system

**STOT - repeated exposure** Thymus

**Aspiration hazard** No information available

**Symptoms / effects, both acute and delayed** Inhalation of high vapor concentrations may cause symptoms like headache, dizziness, tiredness, nausea and vomiting: Product is a corrosive material. Use of gastric lavage or emesis is contraindicated. Possible perforation of stomach or esophagus should be investigated: Ingestion causes severe swelling, severe damage to the delicate tissue and danger of perforation

**Endocrine Disruptor Information** No information available

**Other Adverse Effects** The toxicological properties have not been fully investigated.

## 12. Ecological information

### Ecotoxicity

Do not empty into drains. Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment. The product contains following substances which are hazardous for the environment.

| Component | Freshwater Algae | Freshwater Fish                            | Microtox                                                                        | Water Flea            |
|-----------|------------------|--------------------------------------------|---------------------------------------------------------------------------------|-----------------------|
| Methanol  | Not listed       | Pimephales promelas: LC50 > 10000 mg/L 96h | EC50 = 39000 mg/L 25 min<br>EC50 = 40000 mg/L 15 min<br>EC50 = 43000 mg/L 5 min | EC50 > 10000 mg/L 24h |

**Persistence and Degradability** Persistence is unlikely based on information available.

**Bioaccumulation/ Accumulation** No information available.

**Mobility** Will likely be mobile in the environment due to its volatility.

| Component                     | log Pow |
|-------------------------------|---------|
| Methanol                      | -0.74   |
| Tetramethylammonium hydroxide | -1.4    |

## 13. Disposal considerations

**Waste Disposal Methods** Chemical waste generators must determine whether a discarded chemical is classified as a hazardous waste. Chemical waste generators must also consult local, regional, and national hazardous waste regulations to ensure complete and accurate classification.

| Component          | RCRA - U Series Wastes | RCRA - P Series Wastes |
|--------------------|------------------------|------------------------|
| Methanol - 67-56-1 | U154                   | -                      |

## 14. Transport information

### DOT

UN-No N3286  
Proper Shipping Name Flammable liquid, toxic, corrosive, n.o.s.  
Hazard Class 3  
Subsidiary Hazard Class 6.1, 8  
Packing Group II

### TDG

UN-No UN3286  
Proper Shipping Name Flammable liquid, toxic, corrosive, n.o.s.  
Hazard Class 3  
Subsidiary Hazard Class 6.1, 8  
Packing Group II

### IATA

UN-No UN3286  
Proper Shipping Name FLAMMABLE LIQUID, TOXIC, CORROSIVE, N.O.S.\*  
Hazard Class 3  
Subsidiary Hazard Class 6.1, 8  
Packing Group II

### IMDG/IMO

UN-No UN3286  
Proper Shipping Name Flammable liquid, toxic, corrosive, n.o.s.  
Hazard Class 3  
Subsidiary Hazard Class 6.1, 8  
Packing Group II
