

Classified as hazardous in accordance with the criteria of EPA New Zealand

## Section 1 - Identification

### Product Identifier

**Product Name** Oxidiser 0.05M Iodine in Pyridine/Water (9/1 v/v)

**Recommended Use** Laboratory chemicals.  
**Uses advised against** No Information available

|                                |                                                                                             |

## Section 2 - Hazard(s) Identification

### Classification under Work Safe New Zealand

Classified as hazardous in accordance with the criteria of EPA New Zealand

### GHS Classification

#### Physical hazards

Flammable liquids

Category 2

#### Health hazards

Acute Oral Toxicity  
 Acute Dermal Toxicity  
 Acute Inhalation Toxicity - Vapors  
 Skin Corrosion/Irritation  
 Serious Eye Damage/Eye Irritation  
 Skin Sensitization  
 Carcinogenicity  
 Specific target organ toxicity - (repeated exposure)

Category 4  
 Category 4  
 Category 4  
 Category 2  
 Category 1  
 Category 1  
 Category 2  
 Category 2

#### Environmental hazards

Chronic aquatic toxicity

Category 3

### Label Elements

**Signal Word**

**Danger**

**Hazard Statements**

H225 - Highly flammable liquid and vapor  
H302 - Harmful if swallowed  
H312 - Harmful in contact with skin  
H315 - Causes skin irritation  
H332 - Harmful if inhaled  
H373 - May cause damage to organs through prolonged or repeated exposure  
H318 - Causes serious eye damage  
H317 - May cause an allergic skin reaction  
H351 - Suspected of causing cancer  
H412 - Harmful to aquatic life with long lasting effects

**Precautionary Statements**

**Prevention**

P201 - Obtain special instructions before use  
P202 - Do not handle until all safety precautions have been read and understood  
P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking  
P233 - Keep container tightly closed  
P240 - Ground and bond container and receiving equipment  
P242 - Use non-sparking tools  
P243 - Take action to prevent static discharges  
P264 - Wash face, hands and any exposed skin thoroughly after handling  
P270 - Do not eat, drink or smoke when using this product  
P271 - Use only outdoors or in a well-ventilated area  
P280 - Wear protective gloves/protective clothing/eye protection/face protection

**Response**

P303 + P361 + P353 - IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower  
P304 + P340 - IF INHALED: Remove person to fresh air and keep comfortable for breathing  
P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing  
P312 - Call a POISON CENTER or doctor if you feel unwell  
P330 - Rinse mouth  
P363 - Wash contaminated clothing before reuse  
P370 + P378 - In case of fire: Use dry sand, dry chemical or alcohol-resistant foam to extinguish

**Storage**

P403 + P235 - Store in a well-ventilated place. Keep cool

**Disposal**

P501 - Dispose of contents/ container to an approved waste disposal plant

**Other hazards which do not result in classification**

This product does not contain any known or suspected endocrine disruptors

## Section 3 - Composition and Information on Ingredients

| Component | CAS No    | Weight % |
|-----------|-----------|----------|
| Pyridine  | 110-86-1  | 85 - 90  |
| Iodine    | 7553-56-2 | 1 - 2.5  |
| Water     | 7732-18-5 | 5 - 10   |

## **Section 4 - First Aid Measures**

### **Description of first aid measures**

|                                            |                                                                                                                                                  |
|--------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General Advice</b>                      | If symptoms persist, call a physician.                                                                                                           |
| <b>New Zealand Emergency Tel.</b>          | CHEMTREC®<br>09 980 6780 or +64 9 980 6780                                                                                                       |
| <b>Inhalation</b>                          | Remove to fresh air. If not breathing, give artificial respiration. Get medical attention if symptoms occur.                                     |
| <b>Eye Contact</b>                         | Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Get medical attention.                                  |
| <b>Skin Contact</b>                        | Wash off immediately with plenty of water for at least 15 minutes. If skin irritation persists, call a physician.                                |
| <b>Ingestion</b>                           | Clean mouth with water and drink afterwards plenty of water.                                                                                     |
| <b>Self-Protection of the First Aider</b>  | Ensure that medical personnel are aware of the material(s) involved, take precautions to protect themselves and prevent spread of contamination. |
| <b>First Aid Facilities</b>                | Eyewash, safety shower and washroom.                                                                                                             |
| <b>Most important symptoms and effects</b> | Difficulty in breathing. Inhalation of high vapor concentrations may cause symptoms like headache, dizziness, tiredness, nausea and vomiting     |
| <b>Notes to Physician</b>                  | Treat symptomatically.                                                                                                                           |

## **Section 5 - Fire Fighting Measures**

### **Suitable Extinguishing Media**

CO<sub>2</sub>, dry chemical, dry sand, alcohol-resistant foam. Water mist may be used to cool closed containers.

### **Extinguishing media which must not be used for safety reasons**

No information available.

### **Specific Hazards Arising from the Chemical**

Flammable. Containers may explode when heated. Vapors may form explosive mixtures with air. Vapors may travel to source of ignition and flash back.

### **Hazardous Combustion Products**

Carbon monoxide (CO), Carbon dioxide (CO<sub>2</sub>), Hydrogen cyanide (hydrocyanic acid), Nitrogen oxides (NO<sub>x</sub>).

### **Special protective equipment and precautions for fire fighters**

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

## **Section 6 - Accidental Release Measures**

### **Personal Precautions, Protective Equipment and Emergency Procedures**

#### **Emergency procedures**

Ensure adequate ventilation. Use personal protective equipment as required. Remove all sources of ignition. Take precautionary measures against static discharges.

#### **Environmental Precautions**

Do not flush into surface water or sanitary sewer system.

#### **Methods for Containment and Clean Up**

Soak up with inert absorbent material. Keep in suitable, closed containers for disposal. Remove all sources of ignition. Use spark-proof tools and explosion-proof equipment.

**Precautions to prevent secondary hazards**

Clean contaminated objects and areas thoroughly observing environmental regulations

**Reference to Other Sections**

Refer to protective measures listed in Sections 8 and 13.

## Section 7 - Handling and Storage

**Precautions for Safe Handling**

**Advice on safe handling**

Wear personal protective equipment/face protection. Ensure adequate ventilation. Do not get in eyes, on skin, or on clothing. Avoid ingestion and inhalation. Keep away from open flames, hot surfaces and sources of ignition. Use only non-sparking tools. To avoid ignition of vapors by static electricity discharge, all metal parts of the equipment must be grounded. Take precautionary measures against static discharges.

**Hygiene Measures**

Handle in accordance with good industrial hygiene and safety practice. Keep away from food, drink and animal feeding stuffs. Do not eat, drink or smoke when using this product. Remove and wash contaminated clothing and gloves, including the inside, before re-use. Wash hands before breaks and after work.

**Conditions for Safe Storage, Including any Incompatibilities**

**Storage Conditions**

Keep container tightly closed in a dry and well-ventilated place. Keep away from heat, sparks and flame.

**Incompatible Materials**

Strong acids. Strong oxidizing agents.

AS/NZS 2243.10:2004, Safety in laboratories - Storage of chemicals

AS 1940-2004 - The storage and handling of flammable and combustible liquids

## Section 8 - Exposure Controls and Personal Protection

**Control parameters**

**Exposure limits**

**AUS** - Exposure Standards for Atmospheric Contaminants in the Occupational Environment - Guidance Note on the Interpretation of Exposure Standards for Atmospheric Contaminants in the Occupational Environment [NOHSC:3008(1995)]

Adopted National Exposure Standards for Atmospheric Contaminants in the Occupational Environment [NOHSC:1003(1995)] updated in August, 2005. Safe Work Australia

**ACGIH** - Threshold Limit Values - Ceiling (TLV-C) guidelines by the American Conference of Governmental Industrial Hygienists (ACGIH) for controlling worker exposure to airborne chemical concentrations in the workplace.

**UK** - EH40/2005 Work Exposure Limits, Fourth edition. Published 2020.

**NZ** - Workplace Exposure Standards and Biological Exposure Indices (6th edition). New Zealand Department of Labor

| Component | New Zealand WEL                                                                                  | Australia                               | ACGIH TLV                      | The United Kingdom                                                                                            |
|-----------|--------------------------------------------------------------------------------------------------|-----------------------------------------|--------------------------------|---------------------------------------------------------------------------------------------------------------|
| Pyridine  | TWA: 1 ppm<br>TWA: 3.2 mg/m <sup>3</sup><br>Skin                                                 | TWA: 5 ppm<br>TWA: 16 mg/m <sup>3</sup> | TWA: 1 ppm                     | STEL: 10 ppm 15 min<br>STEL: 33 mg/m <sup>3</sup> 15 min<br>TWA: 5 ppm 8 hr<br>TWA: 16 mg/m <sup>3</sup> 8 hr |

**Biological limit values**

This product, as supplied, does not contain any hazardous materials with biological limits established by the region specific regulatory bodies

**Appropriate engineering controls**

**Engineering Measures**

Ensure that eyewash stations and safety showers are close to the workstation location. Ensure adequate ventilation, especially in confined areas. Use explosion-proof electrical/ventilating/lighting equipment. Wherever possible, engineering control measures such as the isolation or enclosure of the process, the introduction of process or equipment changes to minimise release or contact, and the use of properly designed ventilation systems, should be adopted to control hazardous materials at source

**Individual protection measures, such as personal protective equipment**

**Eye Protection** Goggles (Australian/New Zealand Standard AS/NZS 1337 - Eye protectors for Industrial applications)

**Hand Protection** Protective gloves

| Glove material | Breakthrough time | Glove thickness | AUS/NZ Standard | Glove comments                                                                                               |
|----------------|-------------------|-----------------|-----------------|--------------------------------------------------------------------------------------------------------------|
| Viton (R).     | < 120 minutes     | 0.7 mm          | AS/NZS 2161     | Permeation rate 14 µg/cm2/min As tested under EN374-3 Determination of Resistance to Permeation by Chemicals |
| Butyl rubber   | < 50 minutes      | 0.6 mm          |                 |                                                                                                              |

Inspect gloves before use.

Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. (Refer to manufacturer/supplier for information)

Ensure gloves are suitable for the task: Chemical compatability, Dexterity, Operational conditions, User susceptibility, e.g. sensitisation effects, also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion.

Remove gloves with care avoiding skin contamination.

**Skin and body protection** Long sleeved clothing

**Respiratory Protection** Use an AS/NZS 1716 approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced. To protect the wearer, respiratory protective equipment must be the correct fit and be used and maintained in line with AS/NZS 1715 on the use and maintenance of respiratory protective devices

**Recommended Filter type:** Particulates filter conforming to EN 143 Ammonia and organic ammonia derivatives filter Type K Green conforming to EN14387 (or AUS/NZ equivalent)

**Recommended half mask:-** Valve filtering: EN405 or Half mask: EN140 plus filter, EN 141 (or AUS/NZ equivalent)  
When RPE is used a face piece Fit Test should be conducted

**Hygiene Measures** Handle in accordance with good industrial hygiene and safety practice.

**Environmental exposure controls** Prevent product from entering drains. Do not allow material to contaminate ground water system.

## **Section 9 - Physical and Chemical Properties**

**Information on basic physical and chemical properties**

|                                 |                   |                       |
|---------------------------------|-------------------|-----------------------|
| <b>Physical State</b>           | Liquid            |                       |
| <b>Appearance</b>               | Light brown       |                       |
| <b>Odor</b>                     | Fishy             |                       |
| <b>Odor Threshold</b>           | No data available |                       |
| <b>pH</b>                       | 8.8               |                       |
| <b>Melting Point/Range</b>      | -46 °C / -50.8 °F | Estimated             |
| <b>Softening Point</b>          | No data available |                       |
| <b>Boiling Point/Range</b>      | 115 °C / 239 °F   | Estimated             |
| <b>Flammability (liquid)</b>    | Highly flammable  | On basis of test data |
| <b>Flammability (solid,gas)</b> | Not applicable    | Liquid                |
| <b>Explosion Limits</b>         | No data available |                       |

|                                                |                          |                                       |
|------------------------------------------------|--------------------------|---------------------------------------|
| <b>Flash Point</b>                             | 20 °C / 68 °F            | <b>Method -</b> (based on components) |
| <b>Autoignition Temperature</b>                | No data available        |                                       |
| <b>Decomposition Temperature</b>               | No data available        |                                       |
| <b>Viscosity</b>                               | No data available        |                                       |
| <b>Water Solubility</b>                        | Miscible                 |                                       |
| <b>Solubility in other solvents</b>            | No information available |                                       |
| <b>Partition Coefficient (n-octanol/water)</b> |                          |                                       |
| <b>Component</b>                               | <b>log Pow</b>           |                                       |

| <b>Density / Specific Gravity</b>              | <1                       |                                       |
| <b>Bulk Density</b>                            | Not applicable           | Liquid                                |
| <b>Vapor Density</b>                           | No data available        | (Air = 1.0)                           |
| <b>Particle characteristics</b>                | Not applicable (liquid)  |                                       |

#### Other information

**Explosive Properties** Vapors may form explosive mixtures with air

## Section 10 - Stability and Reactivity

|                                         |                                                                                                                                         |
|-----------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <b>Reactivity</b>                       | None known, based on information available                                                                                              |
| <b>Stability</b>                        | Stable under normal conditions.                                                                                                         |
| <b>Sensitivity to Mechanical Impact</b> | No information available                                                                                                                |
| <b>Sensitivity to Static Discharge</b>  | No information available                                                                                                                |
| <b>Hazardous Polymerization</b>         | No information available.                                                                                                               |
| <b>Hazardous Reactions</b>              | None under normal processing.                                                                                                           |
| <b>Conditions to Avoid</b>              | Heat, flames and sparks, Extremes of temperature and direct sunlight, Keep away from open flames, hot surfaces and sources of ignition. |
| <b>Incompatible Materials</b>           | Strong acids, Strong oxidizing agents.                                                                                                  |
| <b>Hazardous Decomposition Products</b> | Carbon monoxide (CO). Carbon dioxide (CO <sub>2</sub> ). Hydrogen cyanide (hydrocyanic acid). Nitrogen oxides (NO <sub>x</sub> ).       |

## Section 11 - Toxicological Information

#### Acute Effects

#### Information on likely routes of exposure

#### **Product Information**

|                   |                                                                              |
|-------------------|------------------------------------------------------------------------------|
| <b>Inhalation</b> | Not an expected route of exposure.                                           |
| <b>Eyes</b>       | Avoid contact with eyes. Irritating to eyes.                                 |
| <b>Skin</b>       | Avoid contact with skin. May cause irritation. Harmful in contact with skin. |
| <b>Ingestion</b>  | May be harmful if swallowed.                                                 |

#### Numerical measures of toxicity

|                            |            |
|----------------------------|------------|
| <b>(a) acute toxicity;</b> |            |
| Oral                       | Category 4 |

**Dermal** ATE = 952 mg/kg  
Category 4  
**Inhalation** ATE = 1116 mg/kg  
Category 4  
ATE = 14.2 mg/l

**Toxicology data for the components**

| Component | LD50 Oral                | LD50 Dermal                       | LC50 Inhalation                |
|-----------|--------------------------|-----------------------------------|--------------------------------|
| Pyridine  | LD50 = 866 mg/kg ( Rat ) | LD50 1000 - 2000 mg/kg ( Rabbit ) | LC50 = 12.898 mg/L ( Rat ) 4 h |
| Iodine    | 315 mg/kg ( Rat )        | 1425 mg/kg ( Rabbit )             | 4.588 mg/L 4h ( Rat )          |
| Water     | -                        | -                                 | -                              |

**(b) skin corrosion/irritation;** Category 2

**(c) serious eye damage/irritation;** Category 2

**(d) respiratory or skin sensitization;**

**Respiratory** Based on available data, the classification criteria are not met  
**Skin** Based on available data, the classification criteria are not met

| Component                       | Test method                                       | Test species | Study result    |
|---------------------------------|---------------------------------------------------|--------------|-----------------|
| Iodine<br>7553-56-2 ( 1 - 2.5 ) | OECD Test Guideline 429 Local<br>Lymph Node Assay | mouse        | non-sensitising |

**(e) germ cell mutagenicity;** Based on available data, the classification criteria are not met

**(f) carcinogenicity;** Based on available data, the classification criteria are not met

The table below indicates whether each agency has listed any ingredient as a carcinogen

| Component | New Zealand             | Australia | New South<br>Wales | Western<br>Australia | IARC     | EU | UK | Germany |
|-----------|-------------------------|-----------|--------------------|----------------------|----------|----|----|---------|
| Pyridine  | Suspected<br>carcinogen |           |                    |                      | Group 2B |    |    |         |

**(g) reproductive toxicity;** Based on available data, the classification criteria are not met

**(h) STOT-single exposure;** Based on available data, the classification criteria are not met

**(i) STOT-repeated exposure;** Category 2

**Target Organs** Thyroid.

**(j) aspiration hazard;** Based on available data, the classification criteria are not met

**Symptoms / effects, both acute and delayed**

Inhalation of high vapor concentrations may cause symptoms like headache, dizziness, tiredness, nausea and vomiting.

## Section 12 - Ecological Information

**Ecotoxicity**

**Aquatic ecotoxicity**

The product contains following substances which are hazardous for the environment. However, at the concentration present, this preparation is not expected to present

significant adverse environmental effects.

| Component | Freshwater Fish                                                                                                                                                            | Water Flea           | Freshwater Algae     | Microtox           |
|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|----------------------|--------------------|
| Pyridine  | LC50: = 4.6 mg/L, 96h static (Oncorhynchus mykiss)<br>LC50: = 26 mg/L, 96h semi-static (Cyprinus carpio)<br>LC50: 63.4 - 73.6 mg/L, 96h flow-through (Pimephales promelas) |                      |                      |                    |
| Iodine    | LC50 = 1.67 mg/L 96h                                                                                                                                                       | EC50 = 0.55 mg/L 48h | EC50 = 0.13 mg/L 72h | EC50 = 280 mg/L 3h |

**Terrestrial ecotoxicity** There is no data for this product

## Persistence and Degradability

**Persistence** Persistence is unlikely.

**Degradation in sewage treatment plant** Contains substances known to be hazardous to the environment or not degradable in waste water treatment plants.

**Bioaccumulative Potential** Bioaccumulation is unlikely

| Component | log Pow | Bioconcentration factor (BCF) |
|-----------|---------|-------------------------------|
| Pyridine  | 0.65    | No data available             |
| Iodine    | 2.49    | No data available             |

**Mobility** The product is water soluble, and may spread in water systems. Will likely be mobile in the environment due to its water solubility. Highly mobile in soils

## Other adverse effects

**Endocrine Disruptor Information** This product does not contain any known or suspected endocrine disruptors  
**Persistent Organic Pollutant** This product does not contain any known or suspected substance  
**Ozone Depletion Potential** This product does not contain any known or suspected substance

## Section 13 - Disposal Considerations

### Waste treatment methods

**Waste from Residues/Unused Products** Do not allow into drains or watercourses or dispose of where ground or surface waters may be affected. Wastes, including emptied containers, are controlled wastes and should be disposed of in accordance with all federal, E.P.A., state and local regulations. Assure conformity with all applicable regulations.

**Contaminated Packaging** Dispose of this container to hazardous or special waste collection point. Empty containers retain product residue, (liquid and/or vapor), and can be dangerous. Keep product and empty container away from heat and sources of ignition.

**Other Information** Disposal agencies or waste contractors must comply with the New Zealand Hazardous Substances (Disposal) Regulations. Do not flush to sewer. Waste codes should be assigned by the user based on the application for which the product was used. Can be landfilled or incinerated, when in compliance with local regulations.

## Section 14 - Transport Information

| Component                        | Hazchem Code |
|----------------------------------|--------------|
| Pyridine<br>110-86-1 ( 85 - 90 ) | 2WE          |
| Iodine<br>7553-56-2 ( 1 - 2.5 )  | 2WE          |

**NZS 5433:2020**

**IMDG/IMO**

UN-No UN1282  
Proper Shipping Name PYRIDINE SOLUTION  
Hazard Class 3  
Packing Group II

Environmental hazards No hazards identified

Transport in bulk according to  
Annex II of MARPOL 73/78 and the  
IBC Code Not applicable, packaged goods

Special Precautions No special precautions required. Please refer to the applicable dangerous goods regulations for additional information.

Additional information None known

## **Section 15 - Regulatory Information**

**Safety, health and environmental regulations/legislation specific for the substance or mixture**

**National Regulations**

There are no applicable tolerable exposure limits or environmental exposure limits according to the EPA Controls for Hazardous Substances

**Certified handlers, tracking and controlled substance license requirements**

Certified handlers are required for some substances. This includes substances requiring a controlled substance license, and most explosives, vertebrates toxic agents, and certain fumigants. Acutely toxic substances which are a Category 1 or 2, such as pesticides also require Certified handlers. Please check the Health and Safety at Work Act 2015 for further information. Tracking is required for some highly hazardous substances. These substances need to be under the control of an appropriately trained person or appropriately secured. Please check the Health and Safety at Work Act 2015 for further information.

**Prohibition or notification/licensing requirements**

Shown below are details of specific prohibition/notifications or licencing requirements when they apply.

| Component | New Zealand          |
|-----------|----------------------|
| Pyridine  | Suspected carcinogen |

**International Regulations**

**Ozone Depletion Potential** This product does not contain any known or suspected substance

**Persistent Organic Pollutant** This product does not contain any known or suspected substance

**Rotterdam Convention (PIC)** Not applicable

**Authorisation/Restrictions  
according to EU REACH**

| Component | REACH (1907/2006) - Annex XIV -<br>Substances Subject to<br>Authorization | REACH (1907/2006) - Annex XVII -<br>Restrictions on Certain Dangerous<br>Substances | REACH Regulation (EC<br>1907/2006) article 59 - Candidate<br>List of Substances of Very High<br>Concern (SVHC) |
|-----------|---------------------------------------------------------------------------|-------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| Iodine    | -                                                                         | Use restricted. See item 75.<br>(see link for restriction details)                  | -                                                                                                              |
