

Classified as hazardous in accordance with the criteria of EPA New Zealand

## Section 1 - Identification

### Product Identifier

|                      |                              |
|----------------------|------------------------------|
| Product Name         | <u>Dimethyl sulfoxide-d6</u> |
| CAS No               | 2206-27-1                    |
| Synonyms             | Dimethyl-d6 sulfoxide        |
| Molecular Formula    | C2 D6 O S                    |
| Molecular Weight     | 84.18                        |
| Recommended Use      | Laboratory chemicals.        |
| Uses advised against | No Information available     |

|                         |                                                                                             |
|-------------------------|---------------------------------------------------------------------------------------------|
| Product Code            | <b>A16893</b>                                                                               |
| Address                 | Thermo Fisher Scientific New Zealand Ltd<br>244 Bush Road, Albany,<br>Auckland, New Zealand |
| Emergency Tel.          | <b>CHEMTREC®</b><br><b>09 980 6780 or +64 9 980 6780</b>                                    |
| Telephone / Fax Numbers | Tel: 09 980 6700<br>Fax: 09 980 6788                                                        |
| E-mail address          | <a href="mailto:ANZinfo@thermofisher.com">ANZinfo@thermofisher.com</a>                      |

## Section 2 - Hazard(s) Identification

### Classification under Work Safe New Zealand

Classified as hazardous in accordance with the criteria of EPA New Zealand

### GHS Classification

#### Physical hazards

Flammable liquids

Category 4

#### Health hazards

Based on available data, the classification criteria are not met

#### Environmental hazards

Based on available data, the classification criteria are not met

### Label Elements

None required

### Signal Word

Warning

**Hazard Statements**

H227 - Combustible liquid

**Precautionary Statements****Prevention**

P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking

P280 - Wear protective gloves/protective clothing/eye protection/face protection

**Response**

P370 + P378 - In case of fire: Use dry sand, dry chemical or alcohol-resistant foam to extinguish

**Storage**

P403 + P235 - Store in a well-ventilated place. Keep cool

**Disposal**

P501 - Dispose of contents/ container to an approved waste disposal plant

**Other hazards which do not result in classification**

## Section 3 - Composition and Information on Ingredients

| Component                | CAS No    | Weight % |
|--------------------------|-----------|----------|
| Methane-d3, sulfinylbis- | 2206-27-1 | >95      |

## Section 4 - First Aid Measures

**Description of first aid measures**

|                                            |                                                                                                                         |
|--------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>General Advice</b>                      | If symptoms persist, call a physician. Show this safety data sheet to the doctor in attendance.                         |
| <b>New Zealand Emergency Tel.</b>          | CHEMTREC®<br>09 980 6780 or +64 9 980 6780                                                                              |
| <b>Inhalation</b>                          | Remove to fresh air. Get medical attention immediately if symptoms occur.                                               |
| <b>Eye Contact</b>                         | Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Get medical attention.         |
| <b>Skin Contact</b>                        | Wash off immediately with plenty of water for at least 15 minutes. Get medical attention immediately if symptoms occur. |
| <b>Ingestion</b>                           | Clean mouth with water and drink afterwards plenty of water. Get medical attention if symptoms occur.                   |
| <b>Self-Protection of the First Aider</b>  | No special precautions required.                                                                                        |
| <b>First Aid Facilities</b>                | Eyewash, safety shower and washroom.                                                                                    |
| <b>Most important symptoms and effects</b> | None reasonably foreseeable. Symptoms of overexposure may be headache, dizziness, tiredness, nausea and vomiting        |
| <b>Notes to Physician</b>                  | Treat symptomatically. Symptoms may be delayed.                                                                         |

## Section 5 - Fire Fighting Measures

**Suitable Extinguishing Media**

Water spray, carbon dioxide (CO2), dry chemical, alcohol-resistant foam. Water mist may be used to cool closed containers.

**Extinguishing media which must not be used for safety reasons**

No information available.

**Specific Hazards Arising from the Chemical**

Combustible material. Containers may explode when heated. Thermal decomposition can lead to release of irritating gases and vapors.

**Hazardous Combustion Products**

Carbon monoxide (CO), Carbon dioxide (CO<sub>2</sub>), Sulfur oxides, Sulfides, Formaldehyde.

**Decomposition Temperature**

> 190°C

**Special protective equipment and precautions for fire fighters**

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

## Section 6 - Accidental Release Measures

**Personal Precautions, Protective Equipment and Emergency Procedures****Emergency procedures**

Use personal protective equipment as required. Ensure adequate ventilation. Remove all sources of ignition. Take precautionary measures against static discharges.

**Environmental Precautions**

Should not be released into the environment.

**Methods for Containment and Clean Up**

Sweep up and shovel into suitable containers for disposal. Remove all sources of ignition.

**Precautions to prevent secondary hazards**

Clean contaminated objects and areas thoroughly observing environmental regulations

**Reference to Other Sections**

Refer to protective measures listed in Sections 8 and 13.

## Section 7 - Handling and Storage

**Precautions for Safe Handling****Advice on safe handling**

Wear personal protective equipment/face protection. Avoid contact with skin, eyes or clothing. Avoid ingestion and inhalation. Ensure adequate ventilation. Keep away from open flames, hot surfaces and sources of ignition.

**Hygiene Measures**

Handle in accordance with good industrial hygiene and safety practice.

**Conditions for Safe Storage, Including any Incompatibilities****Storage Conditions**

Keep containers tightly closed in a dry, cool and well-ventilated place. Keep away from heat, sparks and flame. Protect from moisture. To maintain product quality: Keep under nitrogen.

**Incompatible Materials**

Strong oxidizing agents. Strong acids. Strong bases.

AS/NZS 2243.10:2004, Safety in laboratories - Storage of chemicals

AS 1940-2004 - The storage and handling of flammable and combustible liquids

## Section 8 - Exposure Controls and Personal Protection

**Control parameters****Exposure limits**

The product does not contain any hazardous materials with occupational exposure limits established.

**Biological limit values**

This product, as supplied, does not contain any hazardous materials with biological limits established by the region specific regulatory bodies

**Appropriate engineering controls****Engineering Measures**

None under normal use conditions. Ensure adequate ventilation, especially in confined areas.

**Individual protection measures, such as personal protective equipment**

**Eye Protection** Wear safety glasses with side shields (or goggles) (Australian/New Zealand Standard AS/NZS 1337 - Eye protectors for Industrial applications)

**Hand Protection** Protective gloves

| Glove material       | Breakthrough time | Glove thickness | AUS/NZ Standard | Glove comments                                                                 |
|----------------------|-------------------|-----------------|-----------------|--------------------------------------------------------------------------------|
| Neoprene, Viton (R). | > 480 minutes     | 0.45 mm         | AS/NZS 2161     | As tested under EN374-3 Determination of Resistance to Permeation by Chemicals |
| Nitrile rubber       | > 480 minutes     | > 0.2 mm        |                 |                                                                                |

Inspect gloves before use.

Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. (Refer to manufacturer/supplier for information)

Ensure gloves are suitable for the task: Chemical compatability, Dexterity, Operational conditions, User susceptibility, e.g. sensitisation effects, also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion.

Remove gloves with care avoiding skin contamination.

**Skin and body protection** Wear appropriate protective gloves and clothing to prevent skin exposure

**Respiratory Protection** Use an AS/NZS 1716 approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced. To protect the wearer, respiratory protective equipment must be the correct fit and be used and maintained in line with AS/NZS 1715 on the use and maintenance of respiratory protective devices

**Recommended Filter type:** Particle filter (or AUS/NZ equivalent)  
**Recommended half mask:-** Valve filtering: EN405 or Half mask: EN140 plus filter, EN 141 (or AUS/NZ equivalent)

**Hygiene Measures** Handle in accordance with good industrial hygiene and safety practice.

**Environmental exposure controls** Prevent product from entering drains.

## **Section 9 - Physical and Chemical Properties**

**Information on basic physical and chemical properties**

|                            |                          |
|----------------------------|--------------------------|
| <b>Physical State</b>      | Liquid                   |
| <b>Appearance</b>          | Colorless                |
| <b>Odor</b>                | Characteristic           |
| <b>Odor Threshold</b>      | No data available        |
| <b>pH</b>                  | No information available |
| <b>Melting Point/Range</b> | 20.2 °C / 68.4 °F        |
| <b>Softening Point</b>     | No data available        |
| <b>Boiling Point/Range</b> | 190 °C / 374 °F          |

|                                                |                                               |                                          |
|------------------------------------------------|-----------------------------------------------|------------------------------------------|
| <b>Flammability (liquid)</b>                   | Combustible liquid                            | On basis of test data                    |
| <b>Flammability (solid,gas)</b>                | Not applicable                                | Liquid                                   |
| <b>Explosion Limits</b>                        | <b>Lower</b> 1.8 Vol%<br><b>Upper</b> 63 Vol% |                                          |

| <b>Molecular Formula</b>    | C2 D6 O S                              |
| <b>Molecular Weight</b>     | 84.18                                  |
| <b>Explosive Properties</b> | explosive air/vapour mixtures possible |

## Section 10 - Stability and Reactivity

|                                         |                                                                                                                                       |
|-----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| <b>Reactivity</b>                       | None known, based on information available                                                                                            |
| <b>Stability</b>                        | Hygroscopic.                                                                                                                          |
| <b>Sensitivity to Mechanical Impact</b> | No information available                                                                                                              |
| <b>Sensitivity to Static Discharge</b>  | No information available                                                                                                              |
| <b>Hazardous Polymerization</b>         | Hazardous polymerization does not occur.                                                                                              |
| <b>Hazardous Reactions</b>              | None under normal processing.                                                                                                         |
| <b>Conditions to Avoid</b>              | Incompatible products, Excess heat, Exposure to moist air or water, Keep away from open flames, hot surfaces and sources of ignition. |
| <b>Incompatible Materials</b>           | Strong oxidizing agents, Strong acids, Strong bases.                                                                                  |
| <b>Hazardous Decomposition Products</b> | Carbon monoxide (CO). Carbon dioxide (CO <sub>2</sub> ). Sulfur oxides. Sulfides. Formaldehyde.                                       |

## Section 11 - Toxicological Information

**Acute Effects****Information on likely routes of exposure**

|                            |                                                                                                              |
|----------------------------|--------------------------------------------------------------------------------------------------------------|
| <b>Product Information</b> | See actual entry in RTECS for complete information.                                                          |
| <b>Inhalation</b>          | May cause irritation of respiratory tract. May be harmful if inhaled.                                        |
| <b>Eyes</b>                | May cause irritation.                                                                                        |
| <b>Skin</b>                | May cause irritation. RAPIDLY ABSORBED THROUGH SKIN.                                                         |
| <b>Ingestion</b>           | May be harmful if swallowed. Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea. |

**Numerical measures of toxicity**

(a) acute toxicity;

|                                               |                                                                  |
|-----------------------------------------------|------------------------------------------------------------------|
| <b>Oral</b>                                   | Based on available data, the classification criteria are not met |
| <b>Dermal</b>                                 | Based on available data, the classification criteria are not met |
| <b>Inhalation</b>                             | Based on available data, the classification criteria are not met |
| <b>(b) skin corrosion/irritation;</b>         | Based on available data, the classification criteria are not met |
| <b>(c) serious eye damage/irritation;</b>     | Based on available data, the classification criteria are not met |
| <b>(d) respiratory or skin sensitization;</b> |                                                                  |
| <b>Respiratory</b>                            | Based on available data, the classification criteria are not met |
| <b>Skin</b>                                   | Based on available data, the classification criteria are not met |
| <b>(e) germ cell mutagenicity;</b>            | Based on available data, the classification criteria are not met |
|                                               | Not mutagenic in AMES Test                                       |
| <b>(f) carcinogenicity;</b>                   | Based on available data, the classification criteria are not met |
|                                               | There are no known carcinogenic chemicals in this product        |
| <b>(g) reproductive toxicity;</b>             | Based on available data, the classification criteria are not met |
| <b>(h) STOT-single exposure;</b>              | Based on available data, the classification criteria are not met |
| <b>(i) STOT-repeated exposure;</b>            | Based on available data, the classification criteria are not met |
| <b>Target Organs</b>                          | None known.                                                      |
| <b>(j) aspiration hazard;</b>                 | Based on available data, the classification criteria are not met |
| <b>Other Adverse Effects</b>                  | The toxicological properties have not been fully investigated.   |

**Symptoms / effects, both acute and delayed**

Symptoms of overexposure may be headache, dizziness, tiredness, nausea and vomiting.

## Section 12 - Ecological Information

### Ecotoxicity

**Aquatic ecotoxicity** Contains no substances known to be hazardous to the environment or that are not degradable in waste water treatment plants. Do not empty into drains.

| Component                | Freshwater Fish                               | Water Flea | Freshwater Algae | Microtox |
|--------------------------|-----------------------------------------------|------------|------------------|----------|
| Methane-d3, sulfinylbis- | Onchorhynchus mykiss:<br>LC50: 38500 mg/L/96H |            |                  |          |

**Terrestrial ecotoxicity** There is no data for this product

**Persistence and Degradability** Biodegradation 90% (28d)

**Persistence** Soluble in water, Persistence is unlikely, based on information available.

**Degradation in sewage treatment** Contains no substances known to be hazardous to the environment or not degradable in

|                                 |                                                                                                                                                               |
|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| plant                           | waste water treatment plants.                                                                                                                                 |
| Bioaccumulative Potential       | Bioaccumulation is unlikely                                                                                                                                   |
| Mobility                        | The product is water soluble, and may spread in water systems. . Will likely be mobile in the environment due to its water solubility. Highly mobile in soils |
| <b>Other adverse effects</b>    |                                                                                                                                                               |
| Endocrine Disruptor Information | This product does not contain any known or suspected endocrine disruptors                                                                                     |
| Persistent Organic Pollutant    | This product does not contain any known or suspected substance                                                                                                |
| Ozone Depletion Potential       | This product does not contain any known or suspected substance                                                                                                |

## Section 13 - Disposal Considerations

### Waste treatment methods

|                                     |                                                                                                                                                                                                                                                                                                                      |
|-------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Waste from Residues/Unused Products | Do not allow into drains or watercourses or dispose of where ground or surface waters may be affected. Wastes, including emptied containers, are controlled wastes and should be disposed of in accordance with all federal, E.P.A., state and local regulations. Assure conformity with all applicable regulations. |
| Contaminated Packaging              | Empty remaining contents. Dispose of in accordance with local regulations. Do not re-use empty containers.                                                                                                                                                                                                           |
| Other Information                   | Disposal agencies or waste contractors must comply with the New Zealand Hazardous Substances (Disposal) Regulations . Do not flush to sewer.                                                                                                                                                                         |

## Section 14 - Transport Information

|                                                                          |                                                                                                                         |
|--------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <u>NZS 5433:2020</u>                                                     | Not regulated                                                                                                           |
| <u>IATA</u>                                                              | Not regulated                                                                                                           |
| <u>IMDG/IMO</u>                                                          | Not regulated                                                                                                           |
| Environmental hazards                                                    | No hazards identified                                                                                                   |
| Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code | Not applicable, packaged goods                                                                                          |
| Special Precautions                                                      | No special precautions required. Please refer to the applicable dangerous goods regulations for additional information. |
| Additional information                                                   | None known                                                                                                              |

## Section 15 - Regulatory Information

### Safety, health and environmental regulations/legislation specific for the substance or mixture

**National Regulations**

There are no applicable tolerable exposure limits or environmental exposure limits according to the EPA Controls for Hazardous Substances

**Certified handlers, tracking and controlled substance license requirements**

Certified handlers are required for some substances. This includes substances requiring a controlled substance license, and most explosives, vertebrates toxic agents, and certain fumigants. Acutely toxic substances which are a Category 1 or 2, such as pesticides also require Certified handlers. Please check the Health and Safety at Work Act 2015 for further information. Tracking is required for some highly hazardous substances. These substances need to be under the control of an appropriately trained person or appropriately secured. Please check the Health and Safety at Work Act 2015 for further information.

**Prohibition or notification/licensing requirements**

Shown below are details of specific prohibition/notifications or licensing requirements when they apply.

**International Regulations**

**Ozone Depletion Potential** This product does not contain any known or suspected substance

**Persistent Organic Pollutant** This product does not contain any known or suspected substance

**Rotterdam Convention (PIC)** Not applicable

**Authorisation/Restrictions according to EU REACH** Not applicable

**International Inventories**

New Zealand (NZIoC), Australia (AICS), Europe (EINECS/ELINCS/NLP), Korea (KECL), China (IECSC), Taiwan (TCSI), Japan (ENCS), Japan (ISHL), Canada (DSL/NDSL), Philippines (PICCS). US EPA (TSCA) - Toxic Substances Control Act, (40 CFR Part 710)

| Component                | CAS No    | NZIoC | AICS | EINECS    | ELINCS | NLP | KECL     | IECSC | TCSI |
|--------------------------|-----------|-------|------|-----------|--------|-----|----------|-------|------|
