

Australian statement of hazardous nature : Classified as hazardous according to criteria of Safe Work Australia

## Section 1 - Identification

Product Name Acetone, ACS, 99.5+%, benzene NMT 2ppm

CAS No 67-64-1

Synonyms 2-Propanone

Product Code **S55593**

Address ThermoFisher Scientific Australia Pty Ltd  
5 Caribbean Drive, Scoresby  
VICTORIA 3179, Australia

Emergency Tel. **CHEMTREC®**  
**03 9757 4559 or +613 9757 4559**

Telephone / Fax Numbers Tel: 1300 735 292  
Fax: 1800 067 639

E-mail address ANZinfo@thermofisher.com

Recommended Use Laboratory chemicals.

Uses advised against This product contains one or more substance(s) on the Illicit Drug Precursors/Reagents list. Verify requirements related to using, handling and storing these substances. This product does not contain any substance(s) subject to Prohibition, Authorization or Restriction. This product does not contain any substance(s) listed on the voluntary National Code of Practice for Chemicals of Security Concern.

## Section 2 - Hazard(s) Identification

### Classification under Safe Work Australia

Classified as hazardous according to criteria of Safe Work Australia

#### Physical hazards

Flammable liquids

Category 2

#### Health hazards

Serious Eye Damage/Eye Irritation  
Specific target organ toxicity - (single exposure)

Category 2  
Category 3

#### Environmental hazards

No hazards identified

### Label Elements

Flame

Exclamation Mark

Signal Word

Danger

#### Hazard Statements

H225 - Highly flammable liquid and vapor  
H319 - Causes serious eye irritation  
H336 - May cause drowsiness or dizziness  
AUH066 - Repeated exposure may cause skin dryness or cracking

#### Precautionary Statements

P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking  
P233 - Keep container tightly closed  
P240 - Ground and bond container and receiving equipment  
P241 - Use explosion-proof electrical/ ventilating/ lighting equipment  
P242 - Use non-sparking tools  
P243 - Take action to prevent static discharges  
P264 - Wash face, hands and any exposed skin thoroughly after handling  
P271 - Use only outdoors or in a well-ventilated area  
P280 - Wear protective gloves/protective clothing/eye protection/face protection  
P303 + P361 + P353 - IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower  
P304 + P340 - IF INHALED: Remove person to fresh air and keep comfortable for breathing  
P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing  
P312 - Call a POISON CENTER or doctor if you feel unwell  
P370 + P378 - In case of fire: Use dry sand, dry chemical or alcohol-resistant foam to extinguish  
P403 + P233 - Store in a well-ventilated place. Keep container tightly closed  
P501 - Dispose of contents/ container to an approved waste disposal plant

#### Other information

## Section 3 - Composition and Information on Ingredients

| Component | CAS No  | Weight % |
|-----------|---------|----------|
| Acetone   | 67-64-1 | >95      |

## Section 4 - First Aid Measures

|              |                                                                                                                   |
|--------------|-------------------------------------------------------------------------------------------------------------------|
| Inhalation   | Remove to fresh air. If not breathing, give artificial respiration. Get medical attention if symptoms occur.      |
| Ingestion    | Clean mouth with water and drink afterwards plenty of water.                                                      |
| Skin Contact | Wash off immediately with plenty of water for at least 15 minutes. If skin irritation persists, call a physician. |
| Eye Contact  | Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Get medical attention.   |

|                                            |                                                                                                                                         |
|--------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <b>General Advice</b>                      | If symptoms persist, call a physician.                                                                                                  |
| <b>Self-Protection of the First Aider</b>  | Remove all sources of ignition. Use personal protective equipment as required.                                                          |
| <b>First Aid Facilities</b>                | Eyewash, safety shower and washroom.                                                                                                    |
| <b>Most important symptoms and effects</b> | Difficulty in breathing. Symptoms of overexposure may be headache, dizziness, tiredness, nausea and vomiting: May cause pulmonary edema |
| <b>Notes to Physician</b>                  | Treat symptomatically. Symptoms may be delayed.                                                                                         |

## Section 5 - Fire Fighting Measures

### **Suitable Extinguishing Media**

Water spray, carbon dioxide (CO<sub>2</sub>), dry chemical, alcohol-resistant foam. Water mist may be used to cool closed containers.

### **Extinguishing media which must not be used for safety reasons**

Do not use water jetstream.

### **Hazardous Decomposition Products**

Carbon monoxide (CO), Carbon dioxide (CO<sub>2</sub>), Formaldehyde, Methanol.

### **Decomposition Temperature**

> 4°C

### **Specific Hazards Arising from the Chemical**

Flammable. Risk of ignition. Containers may explode when heated. Vapors may form explosive mixtures with air. Vapors may travel to source of ignition and flash back.

### **Special protective equipment and precautions for fire fighters**

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

## Section 6 - Accidental Release Measures

### **Emergency procedures**

Use personal protective equipment as required. Ensure adequate ventilation. Remove all sources of ignition. Take precautionary measures against static discharges.

### **Environmental Precautions**

Should not be released into the environment.

### **Methods for Containment and Clean Up**

#### **Clean-up methods - small spillage**

Soak up with inert absorbent material. Keep in suitable, closed containers for disposal. Remove all sources of ignition. Use spark-proof tools and explosion-proof equipment.

#### **Clean-up methods - large spillage**

Typically only supplied in small quantities as packaged goods.

If extremely toxic or used in larger quantities ensure a spillage action plan is in place. Evacuate area. Control the source and/or contain the spill if safe and able to do so. Use temporary diking, sand bags, dry sand, earth or proprietary booms/absorbent pads if available. Obtain advice on containment, neutralisation and clean-up from local emergency responders.

### **Reference to Other Sections**

Refer to protective measures listed in Sections 8 and 13.

## Section 7 - Handling and Storage

### Precautions for Safe Handling

Do not get in eyes, on skin, or on clothing. Wear personal protective equipment/face protection. Ensure adequate ventilation. Avoid ingestion and inhalation. Keep away from open flames, hot surfaces and sources of ignition. Use only non-sparking tools. To avoid ignition of vapors by static electricity discharge, all metal parts of the equipment must be grounded. Take precautionary measures against static discharges.

### Conditions for Safe Storage, Including any Incompatibilities

Flammables area. Keep containers tightly closed in a dry, cool and well-ventilated place. Keep away from heat, sparks and flame.

AS/NZS 2243.10:2004, Safety in laboratories - Storage of chemicals

AS 1940-2004 - The storage and handling of flammable and combustible liquids

## Section 8 - Exposure Controls and Personal Protection

### Exposure limits

**AUS** - Exposure Standards for Atmospheric Contaminants in the Occupational Environment - Guidance Note on the Interpretation of Exposure Standards for Atmospheric Contaminants in the Occupational Environment [NOHSC:3008(1995)]  
Adopted National Exposure Standards for Atmospheric Contaminants in the Occupational Environment [NOHSC:1003(1995)] updated in August, 2005. Safe Work Australia **ACGIH** - Threshold Limit Values - Ceiling (TLV-C) guidelines by the American Conference of Governmental Industrial Hygienists (ACGIH) for controlling worker exposure to airborne chemical concentrations in the workplace. **UK** - EH40/2005 Work Exposure Limits, Fourth edition. Published 2020. **DE** - MAK and BAT values of Hazardous Chemical Compounds in the Work Area. Published by German Research Foundation on July 1, 2011

| Component | Australia                                                                                     | New Zealand WEL                                                                               | ACGIH TLV                     | The United Kingdom                                                                            | Germany                                     |

### Biological limit values

**NZ** - Substances assigned Biological Exposure Indices in the New Zealand Workplace Exposure Standards and Biological Exposure Indices (6th edition). New Zealand Department of Labor

| Component | Australia | New Zealand                            | European Union | United Kingdom | Germany                               |
|-----------|-----------|----------------------------------------|----------------|----------------|---------------------------------------|
| Acetone   |           | 50 mg/L (urine) end of shift (Acetone) |                |                | Acetone: 80 mg/L urine (end of shift) |

### Exposure Controls

#### Engineering Measures

Ensure adequate ventilation, especially in confined areas. Ensure that eyewash stations and safety showers are close to the workstation location. Use explosion-proof electrical/ventilating/lighting equipment.

Wherever possible, engineering control measures such as the isolation or enclosure of the process, the introduction of process or equipment changes to minimise release or contact, and the use of properly designed ventilation systems, should be adopted to control hazardous materials at source

### Personal protective equipment

#### Eye Protection

Goggles (Australian/New Zealand Standard AS/NZS 1337 - Eye protectors for Industrial applications)

#### Hand Protection

Protective gloves

| Glove material  | Breakthrough time | Glove thickness | AUS/NZ Standard | Glove comments                                                                 |
|-----------------|-------------------|-----------------|-----------------|--------------------------------------------------------------------------------|
| Butyl rubber    | > 480 minutes     | 0.5 mm          | AS/NZS 2161     | As tested under EN374-3 Determination of Resistance to Permeation by Chemicals |
| Neoprene gloves | < 30 minutes      | 0.45 mm         |                 |                                                                                |

Inspect gloves before use.

Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. (Refer to manufacturer/supplier for information)

Ensure gloves are suitable for the task: Chemical compatability, Dexterity, Operational conditions, User susceptibility, e.g. sensitisation effects, also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion.

Remove gloves with care avoiding skin contamination.

|                                 |                                                                                                                                                                                                                                                                                                                             |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Skin and body protection</b> | Long sleeved clothing                                                                                                                                                                                                                                                                                                       |
| <b>Respiratory Protection</b>   | Use an AS/NZS 1716 approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced. To protect the wearer, respiratory protective equipment must be the correct fit and be used and maintained in line with AS/NZS 1715 on the use and maintenance of respiratory protective devices |
| <b>Recommended Filter type:</b> | low boiling organic solvent Type AX Brown conforming to EN371 (or AUS/NZ equivalent)                                                                                                                                                                                                                                        |
| <b>Recommended half mask:-</b>  | Valve filtering: EN405 or Half mask: EN140 plus filter, EN 141 (or AUS/NZ equivalent)<br>When RPE is used a face piece Fit Test should be conducted                                                                                                                                                                         |

**Hygiene Measures** Handle in accordance with good industrial hygiene and safety practice.

**Environmental exposure controls** Do not allow material to contaminate ground water system.

## Section 9 - Physical and Chemical Properties

### Information on basic physical and chemical properties

|                                                |                                               |                                             |
|------------------------------------------------|-----------------------------------------------|---------------------------------------------|
| <b>Appearance</b>                              | Colorless                                     |                                             |
| <b>Physical State</b>                          | Liquid                                        |                                             |
| <b>Odor</b>                                    | sweet                                         |                                             |
| <b>Odor Threshold</b>                          | 19.8 ppm                                      |                                             |
| <b>pH</b>                                      | 7                                             |                                             |
| <b>Melting Point/Range</b>                     | -95 °C / -139 °F                              |                                             |
| <b>Softening Point</b>                         | No data available                             |                                             |
| <b>Boiling Point/Range</b>                     | 56 °C / 132.8 °F                              |                                             |
| <b>Flash Point</b>                             | -20 °C / -4 °F                                | <b>Method -</b> CC (closed cup)             |

## Section 10 - Stability and Reactivity

|                                         |                                                                                                                         |
|-----------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>Reactivity</b>                       | None known, based on information available                                                                              |
| <b>Stability</b>                        | Stable under normal conditions.                                                                                         |
| <b>Conditions to Avoid</b>              | Heat, flames and sparks, Incompatible products, Keep away from open flames, hot surfaces and sources of ignition.       |
| <b>Incompatible Materials</b>           | Strong oxidizing agents, Strong reducing agents, Strong bases, Peroxides, Halogenated compounds, Alkali metals, Amines. |
| <b>Hazardous Decomposition Products</b> | Carbon monoxide (CO). Carbon dioxide (CO <sub>2</sub> ). Formaldehyde. Methanol.                                        |
| <b>Hazardous Polymerization</b>         | Hazardous polymerization does not occur.                                                                                |

## Section 11 - Toxicological Information

### Information on Toxicological Effects

#### Product Information

##### (a) acute toxicity;

Oral

Dermal

Inhalation

Based on available data, the classification criteria are not met

Based on available data, the classification criteria are not met

Based on available data, the classification criteria are not met

| Component | LD50 Oral          | LD50 Dermal                                  | LC50 Inhalation     |
|-----------|--------------------|----------------------------------------------|---------------------|
| Acetone   | 5800 mg/kg ( Rat ) | > 15800 mg/kg (rabbit)<br>> 7400 mg/kg (rat) | 76 mg/l, 4 h, (rat) |

(b) skin corrosion/irritation; Based on available data, the classification criteria are not met

##### (c) serious eye damage/irritation;

Test method

Test species

Observation end point

Category 2

OECD 405

rabbit

Irritating to eyes

##### (d) respiratory or skin sensitization;

Respiratory

Skin

Based on available data, the classification criteria are not met

Based on available data, the classification criteria are not met

| Component                  | Test method                            | Test species | Study result    |
|----------------------------|----------------------------------------|--------------|-----------------|
| Acetone<br>67-64-1 ( >95 ) | Guinea Pig Maximisation Test<br>(GPMT) | guinea pig   | non-sensitising |

##### (e) germ cell mutagenicity;

Based on available data, the classification criteria are not met

| Component                  | Test method                                                | Test species | Study result |
|----------------------------|------------------------------------------------------------|--------------|--------------|
| Acetone<br>67-64-1 ( >95 ) | OECD Test Guideline 471<br>AMES test                       | in vivo      | negative     |
|                            | OECD Test Guideline 476<br>Mammalian<br>Gene cell mutation | in vitro     | negative     |

##### (f) carcinogenicity;

Based on available data, the classification criteria are not met

There are no known carcinogenic chemicals in this product

##### (g) reproductive toxicity;

Based on available data, the classification criteria are not met

##### (h) STOT-single exposure;

Category 3

|                                                   |                                                                                                                   |
|---------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|

| <b>(i) STOT-repeated exposure;</b>                | Based on available data, the classification criteria are not met                                                  |
| <b>Test method</b>                                | OECD Test No. 408                                                                                                 |
| <b>Test species / Duration</b>                    | Rat / 90 days                                                                                                     |
| <b>Study result</b>                               | NOAEL = 900 mg/kg                                                                                                 |
| <b>Route of exposure</b>                          | Oral                                                                                                              |
| <b>Target Organs</b>                              | None known.                                                                                                       |
| <b>(j) aspiration hazard;</b>                     | Based on available data, the classification criteria are not met                                                  |
| <b>Symptoms / effects, both acute and delayed</b> | Symptoms of overexposure may be headache, dizziness, tiredness, nausea and vomiting:<br>May cause pulmonary edema |

## Section 12 - Ecological Information

### Ecotoxicity effects

| Component | Freshwater Fish                                                                                                                                                         | Water Flea                                                             | Freshwater Algae              | Microtox                 |
|-----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|-------------------------------|--------------------------|
| Acetone   | Oncorhynchus mykiss: LC50 = 5540 mg/l 96h<br>Alburnus alburnus: LC50 = 11000 mg/l 96h<br>Leuciscus idus: LC50 = 11300 mg/L/48h<br>Salmo gairdneri: LC50 = 6100 mg/L/24h | EC50 = 8800 mg/L/48h<br>EC50 = 12700 mg/L/48h<br>EC50 = 12600 mg/L/48h | NOEC = 430 mg/l (algae; 96 h) | EC50 = 14500 mg/L/15 min |

**Persistence and Degradability** Readily biodegradable  
**Persistence** Persistence is unlikely, based on information available.

| Component                | Degradability            |
|--------------------------|--------------------------|
| Acetone<br>67-64-1 (>95) | 91 % (28 d) (OECD 301 B) |

**Bioaccumulative Potential** Bioaccumulation is unlikely

| Component | log Pow | Bioconcentration factor (BCF) |
|-----------|---------|-------------------------------|
| Acetone   | -0.24   | 0.69 dimensionless            |

**Mobility** The product contains volatile organic compounds (VOC) which will evaporate easily from all surfaces. Will likely be mobile in the environment due to its volatility Disperses rapidly in air

**Endocrine Disruptor Information** This product does not contain any known or suspected endocrine disruptors  
**Persistent Organic Pollutant** This product does not contain any known or suspected substance  
**Ozone Depletion Potential** This product does not contain any known or suspected substance

## Section 13 - Disposal Considerations

**Waste from Residues/Unused Products** Do not allow into drains or watercourses or dispose of where ground or surface waters may be affected. Wastes, including emptied containers, are controlled wastes and should be disposed of in accordance with all federal, E.P.A., state and local regulations. Assure conformity with all applicable regulations.

**Contaminated Packaging** Dispose of this container to hazardous or special waste collection point. Empty containers retain product residue, (liquid and/or vapor), and can be dangerous. Keep product and empty container away from heat and sources of ignition.

**Other Information** Chemical wastes should be disposed through a licensed commercial waste collection service. Waste codes should be assigned by the user based on the application for which the product was used. Do not flush to sewer. Can be landfilled or incinerated, when in compliance with local regulations.

## Section 14 - Transport Information

**IMDG/IMO**

UN-No UN1090  
Proper Shipping Name ACETONE  
Hazard Class 3  
Packing Group II

**ADG**

UN-No UN1090  
Proper Shipping Name ACETONE  
Hazard Class 3  
Packing Group II

| Component                  | Hazchem Code |
|----------------------------|--------------|
| Acetone<br>67-64-1 ( >95 ) | 2YE          |

**IATA**

UN-No UN1090  
Proper Shipping Name ACETONE  
Hazard Class 3  
Packing Group II

Environmental hazards No hazards identified  
Special Precautions No special precautions required  
Additional information None known

## Section 15 - Regulatory Information

**Safety, health and environmental regulations/legislation specific for the substance or mixture**

**National Regulations** Australia

See section 8 for national exposure control parameters.

**Standard for the Uniform Scheduling of Medicines and Poisons**

Classified as a scheduled poison according to the Standard for Uniform Scheduling of Medicines and Poisons.

| Component         | Standard for the Uniform Scheduling of Medicines and Poisons                       |
|-------------------|------------------------------------------------------------------------------------|
| Acetone - 67-64-1 | Schedule 5 listed - except in preparations containing <=25% of designated solvents |

**Australian Industrial Chemicals Introduction Scheme (AICIS)**

| Component         | Australian Industrial Chemicals Introduction Scheme (AICIS) | Additional information |
|-------------------|-------------------------------------------------------------|------------------------|
| Acetone - 67-64-1 | Present                                                     | -                      |

**Australian - Illicit Drug Precursors/Reagents Substance List**

This product contains one or more substance(s) on the Illicit Drug Precursors/Reagents list. Verify requirements related to using, handling and storing these substances.

**Chemicals of Security Concern**

This product does not contain any substance(s) listed on the voluntary National Code of Practice for Chemicals of Security Concern

| Component         | Australian - Illicit Drug Precursors/Reagents Substance List | Chemicals of Security Concern |
|-------------------|--------------------------------------------------------------|-------------------------------|
| Acetone - 67-64-1 | Category 3                                                   |                               |

## Legend

Category 3 - Chemicals and apparatus that may be used in the illicit production of drugs. Purchases from this list should alert companies or organizations to seek further indicators of any suspicious orders or enquiries. No official reporting is required for items on this list unless considered warranted

**National pollutant inventory** Subject to reporting requirements

| Component         | National pollutant inventory      |
|-------------------|-----------------------------------|
| Acetone - 67-64-1 | 10 tonne/yr. Threshold category 1 |

## Prohibition or notification/licensing requirements

Shown below are details of specific prohibition/notifications or licencing requirements when they apply.

This product does not contain any substance(s) subject to Prohibition, Authorization or Restriction.

## International Inventories

| Component | AICS | NZIoC | EINECS    | ELINCS | TSCA | DSL | NDSL | PICCS | ENCS | ISHL | IECSC | KECL     |

### Key literature references and sources for data

<https://echa.europa.eu/information-on-chemicals>  
Suppliers safety data sheet, Chemadvisor - LOLI, Merck index, RTECS

### Training Advice

Chemical hazard awareness training, incorporating labelling, Safety Data Sheets (SDS), Personal Protective Equipment (PPE) and hygiene.

Use of personal protective equipment, covering appropriate selection, compatibility, breakthrough thresholds, care, maintenance, fit and standards.

First aid for chemical exposure, including the use of eye wash and safety showers.

Fire prevention and fighting, identifying hazards and risks, static electricity, explosive atmospheres posed by vapours and dusts.

**Revision Date** 20-Nov-2022  
**Revision Summary** Not applicable.

**This Safety Data Sheet (SDS) is prepared in accordance to and complies with the requirements of Safe Work Australia - Work Health and Safety Regulations (WHS Regulations).**

### Disclaimer

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication. The information given is designed only as a guidance for safe handling, use, processing, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text
