

## SAFETY DATA SHEET

Creation Date 09-April-2010

Revision Date 28-March-2024

Revision Number 4

### 1. Identification

**Product Name** Mercury(II) chloride

**Cat No. :** A17472

**CAS-No** 7487-94-7  
**Synonyms** Mercuric chloride

**Recommended Use** Laboratory chemicals.  
**Uses advised against** Food, drug, pesticide or biocidal product use.

#### Details of the supplier of the safety data sheet

##### Company

##### **Importer/Distributor**

Fisher Scientific  
112 Colonnade Road,  
Ottawa, ON K2E 7L6,  
Canada  
Tel: 1-800-234-7437

##### **Emergency Telephone Number**

For information **US** call: 001-800-227-6701 / **Europe** call: +32 14 57 52 11

Emergency Number **US**:001-201-796-7100 / **Europe**: +32 14 57 52 99

**CHEMTREC** Tel. No. **US**:001-800-424-9300 / **Europe**:001-703-527-3887

### 2. Hazard(s) identification

#### Classification

##### **WHMIS 2015 Classification**

Classified as hazardous under the Hazardous Products Regulations (SOR/2015-17)

|                                                             |            |
|-------------------------------------------------------------|------------|
| <b>Acute oral toxicity</b>                                  | Category 2 |
| <b>Acute dermal toxicity</b>                                | Category 1 |
| <b>Skin Corrosion/Irritation</b>                            | Category 1 |
| <b>Serious Eye Damage/Eye Irritation</b>                    | Category 1 |
| <b>Germ Cell Mutagenicity</b>                               | Category 2 |
| <b>Reproductive Toxicity</b>                                | Category 2 |
| <b>Specific target organ toxicity (single exposure)</b>     | Category 3 |
| Target Organs - Respiratory system.                         |            |
| <b>Specific target organ toxicity - (repeated exposure)</b> | Category 1 |
| Target Organs - Urinary Tract.                              |            |

#### Label Elements

**Signal Word**

Danger

**Hazard Statements**

Fatal if swallowed or in contact with skin  
Causes severe skin burns and eye damage  
May cause respiratory irritation  
Suspected of causing genetic defects  
Suspected of damaging fertility  
Causes damage to organs through prolonged or repeated exposure

**Precautionary Statements****Prevention**

Obtain special instructions before use  
Do not handle until all safety precautions have been read and understood  
Do not breathe dust/fumes/gas/mist/vapours/spray  
Do not get in eyes, on skin, or on clothing  
Wash face, hands and any exposed skin thoroughly after handling  
Do not eat, drink or smoke when using this product  
Wear protective gloves/protective clothing/eye protection/face protection

**Response**

IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/ shower  
IF INHALED: Remove person to fresh air and keep comfortable for breathing  
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing  
Immediately call a POISON CENTER/doctor  
Rinse mouth  
Do NOT induce vomiting  
Wash contaminated clothing before reuse

**Storage**

Store locked up

**Disposal**

Dispose of contents/container to an approved waste disposal plant

**Other Hazards**

Very toxic to aquatic life with long lasting effects  
Light sensitive

### 3. Composition/Information on Ingredients

| Component                             | CAS-No    | Weight % |
|---------------------------------------|-----------|----------|
| Mercury chloride (HgCl <sub>2</sub> ) | 7487-94-7 | >95      |

### 4. First-aid measures

**General Advice**

Show this safety data sheet to the doctor in attendance. Immediate medical attention is required.

**Eye Contact**

In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

|                                        |                                                                                                                                                                                                                                                                                                                                |
|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Skin Contact</b>                    | Wash off immediately with plenty of water for at least 15 minutes. Immediate medical attention is required.                                                                                                                                                                                                                    |
| <b>Inhalation</b>                      | Remove to fresh air. If not breathing, give artificial respiration. Do not use mouth-to-mouth method if victim ingested or inhaled the substance; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Immediate medical attention is required. |
| <b>Ingestion</b>                       | Do NOT induce vomiting. Call a physician or poison control center immediately.                                                                                                                                                                                                                                                 |
| <b>Most important symptoms/effects</b> | Causes burns by all exposure routes. Product is a corrosive material. Use of gastric lavage or emesis is contraindicated. Possible perforation of stomach or esophagus should be investigated: Ingestion causes severe swelling, severe damage to the delicate tissue and danger of perforation                                |
| <b>Notes to Physician</b>              | Treat symptomatically                                                                                                                                                                                                                                                                                                          |

## 5. Fire-fighting measures

|                                         |                                                                                                                                                         |
|-----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Suitable Extinguishing Media</b>     | Substance is nonflammable; use agent most appropriate to extinguish surrounding fire. CO <sub>2</sub> , dry chemical, dry sand, alcohol-resistant foam. |
| <b>Unsuitable Extinguishing Media</b>   | No information available                                                                                                                                |
| <b>Flash Point</b>                      | No information available                                                                                                                                |
| <b>Method -</b>                         | No information available                                                                                                                                |
| <b>Autoignition Temperature</b>         | No information available                                                                                                                                |
| <b>Explosion Limits</b>                 |                                                                                                                                                         |
| <b>Upper</b>                            | No data available                                                                                                                                       |
| <b>Lower</b>                            | No data available                                                                                                                                       |
| <b>Sensitivity to Mechanical Impact</b> | No information available                                                                                                                                |
| <b>Sensitivity to Static Discharge</b>  | No information available                                                                                                                                |

### Specific Hazards Arising from the Chemical

The product causes burns of eyes, skin and mucous membranes.

### Hazardous Combustion Products

Toxic fumes.

### Protective Equipment and Precautions for Firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear. Thermal decomposition can lead to release of irritating gases and vapors.

### NFPA

|               |                     |                    |                         |
|---------------|---------------------|--------------------|-------------------------|
| <b>Health</b> | <b>Flammability</b> | <b>Instability</b> | <b>Physical hazards</b> |
| 4             | 1                   | 1                  | N/A                     |

## 6. Accidental release measures

|                                             |                                                                                                                                                                                     |
|---------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Personal Precautions</b>                 | Use personal protective equipment as required. Evacuate personnel to safe areas. Ensure adequate ventilation. Keep people away from and upwind of spill/leak. Avoid dust formation. |
| <b>Environmental Precautions</b>            | Should not be released into the environment.                                                                                                                                        |
| <b>Methods for Containment and Clean Up</b> | Sweep up and shovel into suitable containers for disposal. Avoid dust formation.                                                                                                    |

## 7. Handling and storage

|                 |                                                                                                                                                                                                                                                               |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Handling</b> | Wear personal protective equipment/face protection. Do not get in eyes, on skin, or on clothing. Use only under a chemical fume hood. Do not ingest. If swallowed then seek immediate medical assistance. Do not breathe (dust, vapor, mist, gas). Avoid dust |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

formation.

**Storage.**

Keep containers tightly closed in a dry, cool and well-ventilated place. Protect from direct sunlight. Corrosives area. Incompatible Materials. Organic materials. Acids. Bases. Strong oxidizing agents. Ammonia. Sulfides. Lead. Metals. copper.

## 8. Exposure controls / personal protection

**Exposure Guidelines**

| Component                             | Alberta                              | British Columbia                     | Ontario TWAEV                        | Quebec                               | ACGIH TLV                            | OSHA PEL                                    | NIOSH                                                                                       |
|---------------------------------------|--------------------------------------|--------------------------------------|--------------------------------------|--------------------------------------|--------------------------------------|---------------------------------------------|---------------------------------------------------------------------------------------------|
| Mercury chloride (HgCl <sub>2</sub> ) | TWA: 0.025 mg/m <sup>3</sup><br>Skin | TWA: 0.025 mg/m <sup>3</sup><br>Skin | TWA: 0.025 mg/m <sup>3</sup><br>Skin | TWA: 0.025 mg/m <sup>3</sup><br>Skin | TWA: 0.025 mg/m <sup>3</sup><br>Skin | (Vacated)<br>Ceiling: 0.1 mg/m <sup>3</sup> | IDLH: 10 mg/m <sup>3</sup><br>TWA: 0.05 mg/m <sup>3</sup><br>Ceiling: 0.1 mg/m <sup>3</sup> |

**Legend**

ACGIH - American Conference of Governmental Industrial Hygienists

OSHA - Occupational Safety and Health Administration

NIOSH: NIOSH - National Institute for Occupational Safety and Health

**Engineering Measures**

Use only under a chemical fume hood. Ensure that eyewash stations and safety showers are close to the workstation location.

Wherever possible, engineering control measures such as the isolation or enclosure of the process, the introduction of process or equipment changes to minimise release or contact, and the use of properly designed ventilation systems, should be adopted to control hazardous materials at source

**Personal protective equipment****Eye Protection**

Goggles

**Hand Protection**

Protective gloves

| Glove material | Breakthrough time                 | Glove thickness | Glove comments         |
|----------------|-----------------------------------|-----------------|------------------------|
| Natural rubber | See manufacturers recommendations | -               | Splash protection only |
| Nitrile rubber |                                   |                 |                        |
| Neoprene       |                                   |                 |                        |
| PVC            |                                   |                 |                        |

Inspect gloves before use. observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. (Refer to manufacturer/supplier for information) gloves are suitable for the task: Chemical compatability, Dexterity, Operational conditions, User susceptibility, e.g. sensitisation effects, also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion. gloves with care avoiding skin contamination.

**Respiratory Protection**

When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced.

To protect the wearer, respiratory protective equipment must be the correct fit and be used and maintained properly

**Recommended Filter type:** Particulates filter conforming to EN 143

When RPE is used a face piece Fit Test should be conducted

**Environmental exposure controls**

Prevent product from entering drains. Do not allow material to contaminate ground water system. Local authorities should be advised if significant spillages cannot be contained.

**Hygiene Measures**

Handle in accordance with good industrial hygiene and safety practice. Keep away from food, drink and animal feeding stuffs. Do

not eat, drink or smoke when using this product. Remove and wash contaminated clothing and gloves, including the inside, before re-use. Wash hands before breaks and after work.

## 9. Physical and chemical properties

|                                        |                          |
|----------------------------------------|--------------------------|
| Physical State                         | Solid                    |

## 10. Stability and reactivity

|                                  |                                                                                                   |
|----------------------------------|---------------------------------------------------------------------------------------------------|
| Reactive Hazard                  | None known, based on information available                                                        |
| Stability                        | Stable under normal conditions. Light sensitive.                                                  |
| Conditions to Avoid              | Avoid dust formation. Incompatible products. Excess heat. Exposure to light.                      |
| Incompatible Materials           | Organic materials, Acids, Bases, Strong oxidizing agents, Ammonia, Sulfides, Lead, Metals, copper |
| Hazardous Decomposition Products | Toxic fumes                                                                                       |
| Hazardous Polymerization         | Hazardous polymerization does not occur.                                                          |
| Hazardous Reactions              | None under normal processing.                                                                     |

## 11. Toxicological information

### Acute Toxicity

#### Product Information

#### Component Information

| Component                             | LD50 Oral                             | LD50 Dermal                | LC50 Inhalation |
|---------------------------------------|---------------------------------------|----------------------------|-----------------|
| Mercury chloride (HgCl <sub>2</sub> ) | 25.9 mg/kg ( Rat )<br>1 mg/kg ( Rat ) | LD50 = 41 mg/kg ( Rabbit ) | Not listed      |

Toxicologically Synergistic Products No information available

#### Delayed and immediate effects as well as chronic effects from short and long-term exposure

Irritation Causes burns by all exposure routes

**Sensitization** No information available

**Carcinogenicity** The table below indicates whether each agency has listed any ingredient as a carcinogen.

| Component                             | CAS-No    | IARC       | NTP        | ACGIH      | OSHA       | Mexico     |
|---------------------------------------|-----------|------------|------------|------------|------------|------------|
| Mercury chloride (HgCl <sub>2</sub> ) | 7487-94-7 | Not listed | Not listed | Not listed | Not listed | Not listed |

**Mutagenic Effects** Possible risk of irreversible effects

**Reproductive Effects** Possible risk of impaired fertility.

**Developmental Effects** No information available.

**Teratogenicity** No information available.

**STOT - single exposure** Respiratory system

**STOT - repeated exposure** Urinary Tract

**Aspiration hazard** No information available

**Symptoms / effects, both acute and delayed** Product is a corrosive material. Use of gastric lavage or emesis is contraindicated. Possible perforation of stomach or esophagus should be investigated: Ingestion causes severe swelling, severe damage to the delicate tissue and danger of perforation

**Endocrine Disruptor Information** No information available

**Other Adverse Effects** See actual entry in RTECS for complete information.

## 12. Ecological information

### Ecotoxicity

Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. The product contains following substances which are hazardous for the environment.

| Component                             | Freshwater Algae | Freshwater Fish                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Microtox   | Water Flea                                   |
|---------------------------------------|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|----------------------------------------------|
| Mercury chloride (HgCl <sub>2</sub> ) | Not listed       | LC50: 0.1 - 0.182 mg/L, 96h flow-through (Pimephales promelas)<br>LC50: 0.096 - 0.133 mg/L, 96h static (Lepomis macrochirus)<br>LC50: 0.13 - 0.19 mg/L, 96h static (Oncorhynchus mykiss)<br>LC50: 0.014 - 0.019 mg/L, 96h flow-through (Oncorhynchus mykiss)<br>LC50: 0.02 - 0.26 mg/L, 96h static (Cyprinus carpio)<br>LC50: = 4.425 mg/L, 96h (Cyprinus carpio)<br>LC50: = 0.4 mg/L, 96h semi-static (Lepomis macrochirus)<br>LC50: = 0.041 mg/L, 96h (Poecilia reticulata)<br>LC50: 5.933 - 10.34 mg/L, 96h static (Poecilia reticulata)<br>LC50: = 0.155 mg/L, 96h (Pimephales promelas) | Not listed | EC50=0.0015mg/L 48 h<br>EC50=0.012mg/L >48 h |

**Persistence and Degradability** Soluble in water Persistence is unlikely based on information available.

**Bioaccumulation/ Accumulation** No information available.

**Mobility** Will likely be mobile in the environment due to its water solubility.

### 13. Disposal considerations

**Waste Disposal Methods** Chemical waste generators must determine whether a discarded chemical is classified as a hazardous waste. Chemical waste generators must also consult local, regional, and national hazardous waste regulations to ensure complete and accurate classification.

### 14. Transport information

#### DOT

UN-No UN1624  
 Proper Shipping Name MERCURIC CHLORIDE  
 Hazard Class 6.1  
 Packing Group II

#### TDG

UN-No UN1624
